SUBJECT INDEX

Acceleration

Determining Hydrodynamic Force on Accelerating Plate in Fluid with Free Surface, Costas Emmanuel Synolakis, EM Nov. 89 p2480-2492.

Acoustic detection

Measurement and Description of Tensile Fracture in Granite, J. F. Labuz, S. P. Shah and C. H. Dowding, EM Sept. 89 p1935-1949.

Active control

Active Optimal Control of Structure Using Optimal Observer, S. Baba, K. Ninoniya and Y. Hayashi, EM Nov. 89 p2564-2581.

Experimental Study of Active Control for MDOF Seismic Structures, L. L. Chung, R. C. Lin, T. T. Soong and A. M. Reinhorn, EM Aug. 89 p1609-1627.

Adaptive systems

Adaptive Modeling, Identification, and Control of Dynamic Structural Systems: II. Applications, Erdal Şfak, EM Nov. 89 p2406-2426.

Adaptive Modeling, Identification, and Control of Dynamic Structural Systems: I. Theory, Erdal Şfak, EM Nov. 89 p2386-2405.

Aerodynamics

Aerodynamic Model Tests of Tall Buildings, Daryl W. Boggs and Jon A. Peterka, EM Mar. 89 p618-635.

Deterministic Model for Wind-Induced Oscillations of Buildings, Thambirajah Balendra, G. K. Nathan and Kok Hin Kang, EM Jan. 89 p179-199.

Mapping and Synthesis of RAndom Pressure Fields, Ahsan Kareem, EM Oct. 89 p2325-2332.

Transient Wind-Induced Internal Pressures, Theodore Stathopoulos and Horia D. Luchian, EM July 89 p1501-1514.

Wind Induced Vibration of Two Flexible Cylindrical Structures, Le-Chung Shiau, EM Sept. 89 p2089-2098.

Wind Response Spectrum, Giovanni Solari, EM Sept. 89 p2057-2073.

Aging

Solidification Theory for Concrete Creep—I. Formulation, Zdeněk P. Bažant and Santosh Prasannan, EM Aug. 89 p1691-1703.

Solidification Theory for Concrete Creep II. Verification and Application, Zdeněk P. Bažant and Santosh Prasannan, EM Aug. 89 p1704-1725.

Algorithms

Characteristics and Computational Procedure in Softening Plasticity, Kenneth Runesson, Ragnar Larsson and Stein Sture, EM Aug. 89 p1628-1646.

Experimental Study of Active Control for MDOF Seismic Structures, L. L. Chung, R. C. Lin, T. T. Soong and A. M. Reinhorn, EM Aug. 89 p1609-1627.

Amplitude

Diffraction of SV Waves by Circular Canyons of Various Depths, Vincent W. Lee and Hong Cao, EM Sept. 89 p2035-2056.

Analysis

Analysis of Long Cantilever Cylindrical Shell Subjected to Wind Loading, K. Chandrashekhara, EM Sept. 89 p2101-2105.

Nonlinear Seismic Analysis of Arch Dams, Michael J. Dowling and John F. Hall, EM Apr. 89 p768-789.

Shear and Normal Stresses in Adhesive Joints, T. M. Roberts, EM Nov. 89 p2460-2479.

Analytical techniques

Load Transfer Mechanisms in Wind-Loaded Cylinders, David A. Pecknold, EM Nov. 89 p2353-2367.

Anchors

Elastic Stiffness of Flat Anchor Region at Cracked Geological Interface, A. P. S. Selvadurai, EM Jan. 89 p18-32.

Anisotropic plates

Stability of Antisymmetric Angle-Ply Laminated Plates, A. A. Khdeir, EM May 89 p952-962.

Anisotropy

Anisotropic Nature of Jointed Rock Mass Strength, Bernard Amadei and William Z. Savage, EM Mar. 89 p525-542.

Point Loads in Cross-Anisotropic Layered Half-spaces, Sandra H. Seale and Eduardo Kausel, EM Mar. 89 p509-542.

Slip Mechanism-Based Constitutive Model for Granular Soils, Ching S. Chang, Saroj P. Weeraratne and Anil Misra, EM Apr. 89 p790-807.

Spheroidal Cavity with Prescribed Asymmetric Displacements in Three-Dimensional Transverse Isotropy, A. H. Zureick, EM Nov. 89 p2427-2439.

Stress Interference in a Transversely Isotropic Body Under Axisymmetric Loading, S. M. Heinrich and J. -Y. Wang, EM Mar. 89 p555-577.

Anistropic soils

Yield Function for Soil with Anistropic Fabric, Masanobu Oda and Hideo Nakayama, EM Jan. 89 p89-104.

Approximation methods

Approximate Analysis of Twisted Parallelepiped, Robert Schmidt, EM Jan. 89 p216-220.

Arches

Asymmetrical Buckling of Prestressed Tapered Arches, Amde M. Wolde-Tinsae and Hossein Foadian, EM Sept. 89 p2020-2034.

Equations of Curved Beams, Sundaramoorthy Rajasekaran and S. Padmanabhan, EM May 89 p1094-1111.

Nonlinear Shallow Curved-Beam Finite Element, Z. M. Elias and K. -L. Chen, EM June 88 p1076-1087.

Asymmetry

Analysis of Long Cantilever Cylindrical Shell Subjected to Wind Loading, K. Chandrashekhara, EM Sept. 89 p2101-2105.

Auto-regressive moving-average models

Modal Identification of Vibrating Structures Using ARMA Model, Yong Lin Pi and N. C. Mickleborough, EM Oct. 89 p2232-2250.

Axial forces

Dynamic Stability of Thin-Walled Structural Members Under Periodic Axial Torque, Tadayoshi Aida, EM Jan. 89 p71-88.

Axial Forces

Shear and Normal Stresses in Adhesive Joints, T. M. Roberts, EM Nov. 89 p2460-2479.

Axial loads

Reliability of Randomly Imperfect Beam-Columns, D. G. Liaw and T. Y. Yang, EM Oct. 89 p2251-2270.

Axisymmetry

Axisymmetric Vibration of Disk Resting on Saturated Layered Half-Space, A. J. Philippacopoulos, EM Oct. 89 p2301-2322.

Circular Plate Analysis by Finite Differences: Energy Approach, Edmund Melerski, EM June 89 p1205-1224.

Error Estimation for Boundary Element Analysis, Joseph J. Rencis and Kwo-Yih Jong, EM Sept. 89 p1993-2010.

Stress Interference in a Transversely Isotropic Body Under Axisymmetric Loading, S. M. Heinrich and J. -Y. Wang, EM Mar. 89 p555-577.

Bars

Model of Finite Strain Creep of Metals, Alan J. Levy and Maciej P. Bieniek, EM July 89 p1472-1487.

Stability of Pretwisted Bars with Various End Torques, Yeong-Bin Yang and Jong-Dar Yau, EM Apr. 89 p671-688.

Base isolation

Comparative Study of Base Isolation Systems, Lin Su, Goodarz Ahmadi and Iradj G. Tadjbakhsh, EM Sept. 89 p1976-1992.

Beaches

Mean Flow Circulation Equations for Shoaling and Breaking Waves, Rodney J. Sobey and Robert J. Thieke, EM Feb. 89 p285-303.

Beam, cantilever

Measurement and Description of Tensile Fracture in Granite, J. F. Labuz, S. P. Shah and C. H. Dowding, EM Sept. 89 p1935-1949.

Beam columns

Beam-Column Element on Weak Winkler Foundation, A. Ghani Razaqpur, EM Aug. 89 p1798-1817.

Optimization of Imperfection-Sensitive Structures, G. V. Palassopoulos, EM Aug. 89 p1663-1682.

Reliability of Randomly Imperfect Beam-Columns, D. G. Liaw and T. Y. Yang, EM Oct. 89 p2251-2270.

Beams

Beam on Partially Yielded Foundation, Shoji E. Yamada, EM Feb. 88 p353-363.

Economical Analysis of Combined Dynamical Systems, Taft H. Broome, Jr., EM Oct. 89 p2122-2135.

Mixed Variational Formulation for Thin-Walled Beams with Shear Lag, K. K. Koo and Y. K. Cheung, EM Oct. 89 p2271-2286.

Parametric Solution of Stresses in Beams, A. J. Durelli and B. Ranganayakamma, EM Feb. 89 p401-414.

Pseudolinear and Equivalent Systems for Large Deflections of Members, Demeter G. Fertis and Sudhakar Pallaki, EM Nov. 89 p2440-2459.

Role of Damping in Anomalous Response to Short Pulse Loading, U. Perego, G. Borino and P. S. Symonds, EM Dec. 89 p2782-2788.

Stiffened Coupled Shear Walls, H. C. Chan and J. S. Kuang, EM Apr. 89 p689-703.

Stochastic Finite Element Expansion for Random Media, P. D. Spanos and Roger Ghanem, EM May 89 p1035-1053.

Stress Distribution and Deformation of Adhesive-Bonded Laminated Composite Beams, S. Cheng, X. Wei and T. Jiang, EM June 89 p1150-1162.

Torsional Stress Concentration in Thin-Walled Beams, Lando Mentrasti, EM Sept. 89 p1882-1902.

Bending

Analysis of Long Cantilever Cylindrical Shell Subjected to Wind Loading, K. Chandrashekhara, EM Sept. 89 p2101-2105.

Bending of Circular Plates Supported at Number of Points, J. Raamachandran and G. C. Bhaskara Reddy, EM Feb. 89 p437-441.

Engineering Large Deflection Theory for Thick Plates, George Z. Voyiadjis and Shahram Sarkani, EM May 89 p935-951.

Finite Deflections of Sandwich Beams and Plates by Finite Element Method, Husam H. Al-Qarra, EM June 89 p1318-1335.

Load Transfer Mechanisms in Wind-Loaded Cylinders, David A. Pecknold, EM Nov. 89 p2353-2367.

Mixed Variational Formulation for Thin-Walled Beams with Shear Lag, K. K. Koo and Y. K. Cheung, EM Oct. 89 p2271-2286.

Shear and Normal Stresses in Adhesive Joints, T. M. Roberts, EM Nov. 89 p2460-2479.

Stress Distribution and Deformation of Adhesive-Bonded Laminated Composite Beams, S. Cheng, X. Wei and T. Jiang, EM June 89 p1150-1162.

Upper Bound to Mechanical Power Transmission Losses in Wire Rope, Raymond A. LeClair, EM Sept. 89 p2011-2019.

Bending moments

Buckling of Three-Dimensional Rigid—Link Model, Chiou S. Lee and Thomas J. Lardner, EM Jan. 89 p163-178.

Biaxial stress

Reliability Analysis of the Mohr Failure Criterion, Harald Kreuzer and Karl V. Bury, EM Mar. 89 p447-464.

Biomechanics

Finite Element Modeling of Left Ventricle, K. B. Chandran, V. Wagle, D. Fisher, S. Collins, J. Rumberger, D. D. McPherson and D. J. Skorton, EM Aug. 89 p1821-1827.

Bluffs

Blockage Correction for Sharp-Edged Bluff Bodies, A. S. Ramamurthy, R. Balachandar and Diep Ngoc Vo, EM July 89 p1569-1576.

Boundaries

Bounds on Response Variability of Stochastic Systems, George Deodatis and Masanobu Shinozuka, EM Nov. 89 p2543-2563.

Contribution of Gaussian Curvature to Strain Energy of Plates, Cheng Zhu and Frank L. DiMaggio, EM July 89 p1434-1440.

Upper Bound to Mechanical Power Transmission Losses in Wire Rope, Raymond A. LeClair, EM Sept. 89 p2011-2019.

Boundary conditions

Boundary Conditions for Planar Granular Flows, Gary C. Pasquarell and Norbert L. Ackermann, EM June 89 p1283-1302.

Buckling and Postbuckling of Heavy Columns, C. Y. Wang, EM Aug. 87 p1229-1233.

Buckling Loads of Columns with Varying Cross Sections, Y. Z. Chen, Y. K. Cheung and J. R. Xie, EM Mar. 89 p662-667.

Boundary element method

Bending of Circular Plates Supported at Number of Points, J. Raamachandran and G. C. Bhaskara Reddy, EM Feb. 89 p437-441.

Error Estimation for Boundary Element Analysis, Joseph J. Rencis and Kwo-Yih Jong, EM Sept. 89 p1993-2010.

Hydrodynamic Pressure on Gravity Dams Subjected to Ground Motions, Chong-Shien Tsai and George C. Lee, EM Mar. 89 p598-617.

Influence Coefficients for Dynamic Response of Foundations, Hong Jinru and Sheldon Cherry, EM Nov. 89 p2493-2506.

Seismic Response of Strip Footings on Zoned Viscoelastic Soils, Jose Dominguez and Ramon Abascal, EM May 89 p913-934.

Boundary value problems

Asymmetrical Buckling of Prestressed Tapered Arches, Amde M. Wolde-Tinsae and Hossein Foadian, EM Sept. 89 p2020-2034.

A Crack Initiating from Rhombic Rigid Inclusion, Norio Hasebe, Minoru Ueda, Yoshiro Ito and Takuji Nakamura, EM Dec. 89 p2738-2748.

Stability of Pretwisted Bars with Various End Torques, Yeong-Bin Yang and Jong-Dar Yau, EM Apr. 89 p671-688.

Bracing

In-Plane Vibrations of x-Braced Frames, Chin-Hao Chang and Guey-Shin Chang, EM Nov. 89 p2368-2385.

Breaking waves

Mean Flow Circulation Equations for Shoaling and Breaking Waves, Rodney J. Sobey and Robert J. Thieke, EM Feb. 89 p285-303.

Bridge decks

Finite Element Analysis of Orthogonally Stiffened Annular Sector Plates, Alavandi Bhimaraddi, Peter J. Moss and Athol J. Carr, EM Sept. 89 p2074-2088.

Bridge design

Stochastic Stability of Bridges Considering Coupled Modes: II, C. G. Bucher and Y. K. Lin, EM Feb. 89 p384-400.

Bridges, box girder

Mixed Variational Formulation for Thin-Walled Beams with Shear Lag, K. K. Koo and Y. K. Cheung, EM Oct. 89 p2271-2286.

Bridges, long span

Motion Stability of Long-Span Bridges Under Gusty Winds, George Tsiatas and Partha P. Sarkar, EM Feb. 88 p257-276.

Bridges, suspension

Motion Stability of Long-Span Bridges Under Gusty Winds, George Tsiatas and Partha P. Sarkar, EM Feb. 88 p257-276.

Brittleness

Microplane Model for Brittle Plastic Material: II. Verification, Zdeněk P. Bažant and Pere C. Prat, EM Oct. 88 p1689-1699.

Microplane Model for Brittle-Plastic Material: I. Theory, Zdeněk Bažant and Pere C. Prat, EM Oct. 88 p1672-1688.

Size Effects on Strength, Toughness and Ductility, Alberto Carpinteri, EM July 89 p1375-1392.

Buckling

Analysis of Large-Diameter Fabricated Steel Tubes Under Transverse Shear, Vasile G. Roman and Alaa E. Elwi, EM Dec. 89 p2587-2600.

Asymmetrical Buckling of Prestressed Tapered Arches, Amde M. Wolde-Tinsae and Hossein Foadian, EM Sept. 89 p2020-2034.

Buckling and Postbuckling Analyses of Struts with Discrete Supports, S. T. Mau, EM Apr. 89 p721-739.

Buckling Behavior of Pressure Loaded Cylindrical Panels, Seishi Yamada and James G. A. Croll, EM Feb. 89 p327-344.

Buckling Loads of Columns with Varying Cross Sections, Y. Z. Chen, Y. K. Cheung and J. R. Xie, EM Mar. 89 p662-667.

Buckling of Three-Dimensional Rigid—Link Model, Chiou S. Lee and Thomas J. Lardner, EM Jan. 89 p163-178.

Creep Buckling of Cylindrical Shell Under Variable Loading, S. M. Arnold, D. N. Robinson and A. F. Saleeb, EM May 89 p1054-1074.

Curved Beam Elements for Nonlinear Analysis, Yeong-Bin Yang, Shy-Rong Kuo and Yunn-Dar Chherng, EM Apr. 89 p840-855.

Cylindrical Buckling Load of Laminated Columns, Izhak Sheinman, EM Mar. 89 p659-661.

Effect of Initial Imperfections on Dynamic Buckling of Shells, Steven W. Kirkpatrick and Bayard S. Holmes, EM May 89 p1075-1093.

Equations of Curved Beams, Sundaramoorthy Rajasekaran and S. Padmanabhan, EM May 89 p1094-1111.

Finite Deflections of Sandwich Beams and Plates by Finite Element Method, Husam H. Al-Qarra, EM June 89 p1318-1335.

Interaction of Buckling Modes of Panels with Symmetric Cross Section, Q. S. Fan, EM Nov. 89 p2526-2542.

Lower Bounds for Eigenvalues via Rayleigh's Method, Robert Schmidt, EM June 89 p1365-1370.

Nonlinear Shallow Curved-Beam Finite Element, Z. M. Elias and K. -L. Chen, EM June 88 p1076-1087.

Optimization of Imperfection-Sensitive Structures, G. V. Palassopoulos, EM Aug. 89 p1663-1682.

Reliability of Randomly Imperfect Beam-Columns, D. G. Liaw and T. Y. Yang, EM Oct. 89 p2251-2270.

Stability of Antisymmetric Angle-Ply Laminated Plates, A. A. Khdeir, EM May 89 p952-962.

Stability of Spherical Shells on Elastic and Viscoelastic Foundations, D. N. Paliwal and R. N. Rai, EM May 89 p1121-1128.

Static Buckling of Orthotropic Spherical Shells on Elastic Foundations, Rakesh K. Jain and Yogendra Nath, EM Dec. 89 p2621-2634.

Stress Distribution and Deformation of Adhesive-Bonded Laminated Composite Beams, S. Cheng, X. Wei and T. Jiang, EM June 89 p1150-1162.

Tension Buckling of Rectangular Sheets Due to Concentrated Forces, Arthur W. Leissa and Essam F. Ayoub, EM Dec. 89 p2749-2762.

Viscoelastic Stability of Columns on Continuous Support, Liang-Jenq Leu and Yeong-Bin Yang, EM July 89 p1488-1499.

Building design

Antiplane Earthquake Waves in Long Structures, M. I. Todorovska and M. D. Trifunac, EM Dec. 89 p2787-2708.

Seismic Waves in Buildings with Shear Walls Or Central Core, M. I. Todorovska and V. W. Lee, EM Dec. 89 p2669-2686.

Transient Wind-Induced Internal Pressures, Theodore Stathopoulos and Horia D. Luchian, EM July 89 p1501-1514.

Buildings

Antiplane Earthquake Waves in Long Structures, M. I. Todorovska and M. D. Trifunac, EM Dec. 89 p2787-2708.

Deterministic Model for Wind-Induced Oscillations of Buildings, Thambirajah Balendra, G. K. Nathan and Kok Hin Kang, EM Jan. 89 p179-199.

In-Plane Vibrations of x-Braced Frames, Chin-Hao Chang and Guey-Shin Chang, EM Nov. 89 p2368-2385.

Seismic Waves in Buildings with Shear Walls Or Central Core, M. I. Todorovska and V. W. Lee, EM Dec. 89 p2669-2686.

Transient Wind-Induced Internal Pressures, Theodore Stathopoulos and Horia D. Luchian, EM July 89 p1501-1514.

Buoys

"Snaking" of Floating Marine Oil Hose Attached to SPM Buoy, Jim Bree, A. Roy Halliwell and Tom O'Donoghue, EM Feb. 89 p265-284.

Cables

Basic Problem on Optimal Spatial Cable Layout, C. M. Wang and D. Jin, EM May 89 p1115-1120.

Effect of Length on Fatigue Life of Cables, J. L. Bogdanoff and F. Kozin, EM June 87 p925-940.

Effect of Length on Fatigue Life of Long Thin Continuous Components, J. L. Bogdanoff and F. Kozin, EM July 89 p1441-1457.

Effect of Length on Fatigue Life of Cables, J. L. Bogdanoff and F. Kozin, EM June 87 p925-940.

Calibration

Microplane Model for Brittle Plastic Material: II. Verification, Zdeněk P. Bažant and Pere C. Prat, EM Oct. 88 p1689-1699.

Canyons

Diffraction of SV Waves by Circular Canyons of Various Depths, Vincent W. Lee and Hong Cao, EM Sept. 89 p2035-2056.

Capacity

Influential Mode of Imperfection on Carrying Capacity of Structures, Fumio Nishino and Wibisono Hartono, EM Oct. 89 p2150-2165.

Cavities

Spheroidal Cavity with Prescribed Asymmetric Displacements in Three-Dimensional Transverse Isotropy, A. H. Zureick, EM Nov. 89 p2427-2439.

Stress Interference in a Transversely Isotropic Body Under Axisymmetric Loading, S. M. Heinrich and J. -Y. Wang, EM Mar. 89 p555-577.

Cement paste

Continuum Damage of Cement Paste and Mortar as Affected by Porosity and Sand Concentration, Jiann-Wen Ju, Paulo J. M. Monteiro and Ahmed I. Rashed, EM Jan. 89 p105-130.

Chimneys

Analysis of Long Cantilever Cylindrical Shell Subjected to Wind Loading, K. Chandrashekhara, EM Sept. 89 p2101-2105.

Wind Induced Vibration of Two Flexible Cylindrical Structures, Le-Chung Shiau, EM Sept. 89 p2089-2098.

Closed form solutions

Beam on Partially Yielded Foundation, Shoji E. Yamada, EM Feb. 88 p353-363.

A Crack Initiating from Rhombic Rigid Inclusion, Norio Hasebe, Minoru Ueda, Yoshiro Ito and Takuji Nakamura, EM Dec. 89 p2738-2748.

Equivalent Systems for Variable Thickness Plates, Demeter G. Fertis and Milos M. Mijatov, EM Oct. 89 p2287-2300.

Stiffened Coupled Shear Walls, H. C. Chan and J. S. Kuang, EM Apr. 89 p689-703.

Coastal engineering

Mean Flow Circulation Equations for Shoaling and Breaking Waves, Rodney J. Sobey and Robert J. Thieke, EM Feb. 89 p285-303.

Coefficients

Blockage Correction for Sharp-Edged Bluff Bodies, A. S. Ramamurthy, R. Balachandar and Diep Ngoc Vo, EM July 89 p1569-1576.

Influence Coefficients for Dynamic Response of Foundations, Hong Jinru and Sheldon Cherry, EM Nov. 89 p2493-2506.

Cold-formed steel

Analysis of Large-Diameter Fabricated Steel Tubes Under Transverse Shear, Vasile G. Roman and Alaa E. Elwi, EM Dec. 89 p2587-2600.

Collapse load

Analysis of R/C Panels Using Different Concrete Models, Michael A. Crisfield and John Wills, EM Mar. 89 p578-597.

Columns

Buckling and Postbuckling of Heavy Columns, C. Y. Wang, EM Aug. 87 p1229-1233.

Buckling Loads of Columns with Varying Cross Sections, Y. Z. Chen, Y. K. Cheung and J. R. Xie, EM Mar. 89 p662-667.

Dynamic Stability Analysis by Matrix Function, Tsunemi Shigematsu, Takashi Hara and Mitao Ohga, EM July 87 p1085-1100.

Hysteretic Column Under Earthquake Excitations, Ismail I. Orabi, Goodarz Ahmadi and Lin Su, EM Jan. 89 p33-51.

Mixed Variational Formulation for Thin-Walled Beams with Shear Lag, K. K. Koo and Y. K. Cheung, EM Oct. 89 p2271-2286.

Viscoelastic Stability of Columns on Continuous Support, Liang-Jenq Leu and Yeong-Bin Yang, EM July 89 p1488-1499.

Columns, restrained

Inelastic Cyclic Response of Restrained Imperfect Columns, Manolis Papadrakakis and Kostas Loukakis, EM Feb. 88 p295-313.

Comparative studies

Evolutionary Kanai-Tajimi Earthquake Models, Y. K. Lin and Yan Yong, EM Aug. 87 p1119-1137.

Composite columns

Cylindrical Buckling Load of Laminated Columns, Izhak Sheinman, EM Mar. 89 p659-661.

Composite materials

Large Deflections of Orthotropic Plates Under Pressure, Gordon H. Little, EM Dec. 89 p2601-2620.

A Posteriori Estimates for the Shear Correction Factors in Multilayered Composite Cylinders, Ahmed K. Noor and Jeanne M. Peters, EM June 89 p1225-1244.

Stress Distribution and Deformation of Adhesive-Bonded Laminated Composite Beams, S. Cheng, X. Wei and T. Jiang, EM June 89 p1150-1162.

Composite structures

Cylindrical Buckling Load of Laminated Columns, Izhak Sheinman, EM Mar. 89 p659-661.

Stability of Antisymmetric Angle-Ply Laminated Plates, A. A. Khdeir, EM May 89 p952-962.

Compressibility

Determining Hydrodynamic Force on Accelerating Plate in Fluid with Free Surface, Costas Emmanuel Synolakis, EM Nov. 89 p2480-2492.

Mechanical Model for Oscillating Water Column with Compressibility, S. Szumko, EM Sept. 89 p1851-1866.

Compression

Dynamic Triaxial Tests of High-Strength Concrete, J. K. Gran, A. L. Florence and J. D. Colton, EM May 89 p891-904.

Microplane Model for Brittle-Plastic Material: I. Theory, Zdeněk Bažant and Pere C. Prat, EM Oct. 88 p1672-1688.

Compression waves

Dynamics of Saturated Rocks. II: Body Waves, Dimitri E. Beskos, Irene Vgenopoulou and Constantine P. Providakis, EM May 89 p996-1016.

Computation

Finite Strip-Elements for Thick Plate Analysis, Joseph Petrolito, William A. Grice and Bruce W. Golley, EM June 89 p1163-1182.

Mean Flow Circulation Equations for Shoaling and Breaking Waves, Rodney J. Sobey and Robert J. Thieke, EM Feb. 89 p285-303.

Computer analysis

Large Deflections of Orthotropic Plates Under Pressure, Gordon H. Little, EM Dec. 89 p2601-2620.

Computer applications

Finite Element Modeling of Left Ventricle, K. B. Chandran, V. Wagle, D. Fisher, S. Collins, J. Rumberger, D. D. McPherson and D. J. Skorton, EM Aug. 89 p1821-1827.

Computerized control systems

Experimental Digital Control of Structures, J. Rodellar, L. L. Chung, T. T. Soong and A. M. Reinhorn, EM June 89 p1245-1261.

Computerized simulation

Chaotic Behavior of Particle on Vibrating Plate, Allen T. Hjelmfelt, Jr., EM July 89 p1458-1471.

Concentrated loads

Tension Buckling of Rectangular Sheets Due to Concentrated Forces, Arthur W. Leissa and Essam F. Ayoub, EM Dec. 89 p2749-2762.

Concrete

Analysis of Mixed-Mode Fracture in Concrete, Jan G. Rots and René de Borst, EM Nov. 87 p1739-1758.

Analytical Study on Deformation of Fresh Concrete, Yasuo Tanigawa and Hiroshi Mori, EM Mar. 89 p493-508.

Biaxial Tension Stiffening Due to Generally Oriented Reinforcing Layers, R. A. Link, A. E. Elwi and A. Scanlon, EM Aug. 89 p1647-1662.

Constitutive Equations for Concrete in Failure State, R. de Boer and H. T. Dresenkamp, EM Aug. 89 p1591-1608.

Continuum Damage of Cement Paste and Mortar as Affected by Porosity and Sand Concentration, Jiann-Wen Ju, Paulo J. M. Monteiro and Ahmed I. Rashed, EM Jan. 89 p105-130.

Continuum Damage Theory—Application to Concrete, J. M. Mazars and G. Pijaudier-Cabot, EM Feb. 89 p345-365.

Dynamic Triaxial Tests of High-Strength Concrete, J. K. Gran, A. L. Florence and J. D. Colton, EM May 89 p891-904.

Extraction of Constitutive Data from Specimens Undergoing Strain Localization, M. Ortiz, EM Aug. 89 p1748-1760.

FEM Dynamic Fracture Analysis of Concrete Beams, Jiaji Du, Albert S. Kobayashi and Neil M. Hawkins, EM Oct. 89 p2136-2149.

Fracture Energy-Based Plasticity Formulation of Plain Concrete, Eddy Pramono and Kaspar Willam, EM June 89 p1183-1204.

Measurement of Characteristic Length of Nonlocal Continuum, Zdeněk P. Bažant and Gilles Pijaudier-Cabot, EM Apr. 89 p755-767.

Mode I Fracture in Concrete Using Center-Cracked Plate Specimens, Manuel A. Alvarado, Surendra P. Shah and Reji John, EM Feb. 89 p366-383.

Nonlinear Seismic Analysis of Arch Dams. Michael J. Dowling and John F. Hall, EM Apr. 89 p768-789.

Size Effect in Concrete, David Fanella and Dusan Krajcinovic, EM Apr. 88 p704-715.

Smooth Limit Surfaces for Metals, Concrete, and Geotechnical Materials, Howard L. Schreyer, EM Sept. 89 p1960-1975.

Solidification Theory for Concrete Creep—I. Formulation, Zdeněk P. Bažant and Santosh Prasannan, EM Aug. 89 p1691-1703.

Concrete Creep

Solidification Theory for Concrete Creep II. Verification and Application, Zdeněk P. Bažant and Santosh Prasannan, EM Aug. 89 p1704-1725.

Concrete durability

Analysis of R/C Panels Using Different Concrete Models, Michael A. Crisfield and John Wills, EM Mar. 89 p578-597.

Concrete properties

Extraction of Constitutive Data from Specimens Undergoing Strain Localization, M. Ortiz, EM Aug. 89 p1748-1760.

Concrete, reinforced

Analysis of R/C Panels Using Different Concrete Models, Michael A. Crisfield and John Wills, EM Mar. 89 p578-597.

Biaxial Tension Stiffening Due to Generally Oriented Reinforcing Layers, R. A. Link, A. E. Elwi and A. Scanlon, EM Aug. 89 p1647-1662.

Continuum Damage Theory—Application to Concrete, J. M. Mazars and G. Pijaudier-Cabot, EM Feb. 89 p345-365.

Finite Element Model for Curved Embedded Reinforcement, Alaa E. Elwi and Terry M. Hrudey, EM Apr. 89 p740-754.

Concrete structures

Biaxial Tension Stiffening Due to Generally Oriented Reinforcing Layers, R. A. Link, A. E. Elwi and A. Scanlon, EM Aug. 89 p1647-1662.

Concrete tests

Microplane Model for Brittle Plastic Material: II. Verification, Zdeněk P. Bažant and Pere C. Prat, EM Oct. 88 p1689-1699.

Microplane Model for Brittle-Plastic Material: I. Theory, Zdeněk Bažant and Pere C. Prat, EM Oct. 88 p1672-1688.

Constitutive equations

Constitutive Equations for Concrete in Failure State, R. de Boer and H. T. Dresenkamp, EM Aug. 89 p1591-1608.

Equivalent Linearization Method in Nonlinear FEM, Ion Simulescu, Takashi Mochio and Masanobu Shinozuka, EM Mar. 89 p475-492.

Numerical Representation of Bodner Viscoplastic Constitutive Model, Faysal A. Kolkailah and Andrew J. McPhate, EM Feb. 89 p223-230.

Simple Mean Free Path Theory for Stresses in a Rapid Granular Flow, Marijan Babić and Hayley H. Shen, EM June 89 p1262-1282.

Constitutive models

Constitutive Model and Finite Element Procedure for Dilatant Contact Problems, Michael E. Plesha, Roberto Ballarini and Atul Parulekar, EM Dec. 89 p2649-2668.

Continuum Damage of Cement Paste and Mortar as Affected by Porosity and Sand Concentration, Jiann-Wen Ju, Paulo J. M. Monteiro and Ahmed I. Rashed, EM Jan. 89 p105-130.

Fracture Energy-Based Plasticity Formulation of Plain Concrete, Eddy Pramono and Kaspar Willam, EM June 89 p1183-1204.

Numerical Representation of Bodner Viscoplastic Constitutive Model, Faysal A. Kolkailah and Andrew J. McPhate, EM Feb. 89 p223-230.

A Self-Adaptive Model for Structural Softening of Brittle Materials, Alberto Franchi and Francesco Genna, EM July 89 p1543-1558.

Stability of Frictional Materials, K. Runesson and S. Sture, EM Aug. 89 p1828-1833.

Structural Analysis of Bimodular Materials, W. W. El-Tahan, G. H. Staab, S. H. Advani and J. K. Lee, EM May 89 p963-981.

Constitutive relations

Extraction of Constitutive Data from Specimens Undergoing Strain Localization, M. Ortiz, EM Aug. 89 p1748-1760.

Solidification Theory for Concrete Creep—I. Formulation, Zdeněk P. Bažant and Santosh Prasannan, EM Aug. 89 p1691-1703.

Solidification Theory for Concrete Creep II. Verification and Application, Zdeněk P. Bažant and Santosh Prasannan, EM Aug. 89 p1704-1725.

Contact pressure

Constitutive Model and Finite Element Procedure for Dilatant Contact Problems, Michael E. Plesha, Roberto Ballarini and Atul Parulekar, EM Dec. 89 p2649-2668.

Frictional Punch and Crack in Plane Elasticity, Norio Hasebe, Mikiya Okumura and Takuji Nakamura, EM June 89 p1137-1149.

Containers

Nonlinear Oscillations in Rectangular Tanks, T. G. Lepelletier and F. Raichlen, EM Jan. 88 p1-23.

Continuum mechanics

Dynamics of Saturated Rocks. I: Equations of Motion, Dimitri E. Beskos, EM May 89 p982-995.

Energy-Based Coupled Elastoplastic Damage Models at Finite Strains, J. W. Ju, EM Nov. 89 p2507-2525.

Measurement of Characteristic Length of Nonlocal Continuum, Zdeněk P. Bažant and Gilles Pijaudier-Cabot, EM Apr. 89 p755-767.

Contraction

Blockage Correction for Sharp-Edged Bluff Bodies, A. S. Ramamurthy, R. Balachandar and Diep Ngoc Vo, EM July 89 p1569-1576.

Control

Adaptive Modeling, Identification, and Control of Dynamic Structural Systems: II. Applications, Erdal Şfak, EM Nov. 89 p2406-2426.

Adaptive Modeling, Identification, and Control of Dynamic Structural Systems: I. Theory, Erdal Şfak, EM Nov. 89 p2386-2405.

Control systems

Active Optimal Control of Structure Using Optimal Observer, S. Baba, K. Ninoniya and Y. Hayashi, EM Nov. 89 p2564-2581.

Corners

A Crack Initiating from Rhombic Rigid Inclusion, Norio Hasebe, Minoru Ueda, Yoshiro Ito and Takuji Nakamura, EM Dec. 89 p2738-2748.

Correlation analysis

Stochastic Finite Element Expansion for Random Media, P. D. Spanos and Roger Ghanem, EM May 89 p1035-1053.

Coupled walls

Stiffened Coupled Shear Walls, H. C. Chan and J. S. Kuang, EM Apr. 89 p689-703.

Crack

Frictional Punch and Crack in Plane Elasticity, Norio Hasebe, Mikiya Okumura and Takuji Nakamura, EM June 89 p1137-1149.

Crack initiation

A Crack Initiating from Rhombic Rigid Inclusion, Norio Hasebe, Minoru Ueda, Yoshiro Ito and Takuji Nakamura, EM Dec. 89 p2738-2748.

Crack propagation

Measurement and Description of Tensile Fracture in Granite, J. F. Labuz, S. P. Shah and C. H. Dowding, EM Sept. 89 p1935-1949.

Cracking

Analysis of Mixed-Mode Fracture in Concrete, Jan G. Rots and René de Borst, EM Nov. 87 p1739-1758.

Microplane Model for Brittle-Plastic Material: I. Theory, Zdeněk Bažant and Pere C. Prat, EM Oct. 88 p1672-1688.

Nonlinear Seismic Analysis of Arch Dams, Michael J. Dowling and John F. Hall, EM Apr. 89 p768-789.

Size Effects on Strength, Toughness and Ductility, Alberto Carpinteri, EM July 89 p1375-1392.

Cracks

Analysis of R/C Panels Using Different Concrete Models, Michael A. Crisfield and John Wills, EM Mar. 89 p578-597.

Biaxial Tension Stiffening Due to Generally Oriented Reinforcing Layers, R. A. Link, A. E. Elwi and A. Scanlon, EM Aug. 89 p1647-1662.

Continuum Damage of Cement Paste and Mortar as Affected by Porosity and Sand Concentration, Jiann-Wen Ju, Paulo J. M. Monteiro and Ahmed I. Rashed, EM Jan. 89 p105-130.

A Crack Initiating from Rhombic Rigid Inclusion, Norio Hasebe, Minoru Ueda, Yoshiro Ito and Takuji Nakamura, EM Dec. 89 p2738-2748.

Energy-Based Coupled Elastoplastic Damage Models at Finite Strains, J. W. Ju, EM Nov. 89 p2507-2525.

Measurement of Characteristic Length of Nonlocal Continuum, Zdeněk P. Bažant and Gilles Pijaudier-Cabot, EM Apr. 89 p755-767.

Mode I Fracture in Concrete Using Center-Cracked Plate Specimens, Manuel A. Alvarado, Surendra P. Shah and Reji John, EM Feb. 89 p366-383.

Size Effects on Strength, Toughness and Ductility, Alberto Carpinteri, EM July 89 p1375-1392.

Creep

Creep Buckling of Cylindrical Shell Under Variable Loading, S. M. Arnold, D. N. Robinson and A. F. Saleeb, EM May 89 p1054-1074.

Model of Finite Strain Creep of Metals, Alan J. Levy and Maciej P. Bieniek, EM July 89 p1472-1487.

Numerical Representation of Bodner Viscoplastic Constitutive Model, Faysal A. Kolkailah and Andrew J. McPhate, EM Feb. 89 p223-230.

Predicting Creep of Nailed Lumber-to-Plywood Joints, Anton Polensek and Sangsik Jang, EM Oct. 89 p2182-2198.

Solidification Theory for Concrete Creep—I. Formulation, Zdeněk P. Bažant and Santosh Prasannan, EM Aug. 89 p1691-1703.

Viscoelastic Stability of Columns on Continuous Support, Liang-Jenq Leu and Yeong-Bin Yang, EM July 89 p1488-1499.

Critical load

Stability of Pretwisted Bars with Various End Torques, Yeong-Bin Yang and Jong-Dar Yau, EM Apr. 89 p671-688.

Curvature

Finite Element Analysis of Orthogonally Stiffened Annular Sector Plates, Alavandi Bhimaraddi, Peter J. Moss and Athol J. Carr, EM Sept. 89 p2074-2088.

Finite Element Model for Curved Embedded Reinforcement, Alaa E. Elwi and Terry M. Hrudey, EM Apr. 89 p740-754.

Curve fitting

Numerical Representation of Bodner Viscoplastic Constitutive Model, Faysal A. Kolkailah and Andrew J. McPhate, EM Feb. 89 p223-230.

Curved beams

Curved Beam Elements for Nonlinear Analysis, Yeong-Bin Yang, Shy-Rong Kuo and Yunn-Dar Chherng, EM Apr. 89 p840-855.

Equations of Curved Beams, Sundaramoorthy Rajasekaran and S. Padmanabhan, EM May 89 p1094-1111.

Finite Element Analysis of Orthogonally Stiffened Annular Sector Plates, Alavandi Bhimaraddi, Peter J. Moss and Athol J. Carr, EM Sept. 89 p2074-2088.

Nonlinear Shallow Curved-Beam Finite Element, Z. M. Elias and K. -L. Chen, EM June 88 p1076-1087.

Cyclic loads

Inelastic Cyclic Response of Restrained Imperfect Columns, Manolis Papadrakakis and Kostas Loukakis, EM Feb. 88 p295-313.

Rate-Dependent Material Model for Structural Steel, K. C. Chang, K. Sugiura and G. C. Lee, EM Mar. 89 p465-474.

Cylinders

Analysis of Large-Diameter Fabricated Steel Tubes Under Transverse Shear, Vasile G. Roman and Alaa E. Elwi, EM Dec. 89 p2587-2600.

Force Oscillator Model for Rectangular Cylinder, Stephen John Callander, EM June 89 p1336-1346.

A Posteriori Estimates for the Shear Correction Factors in Multilayered Composite Cylinders, Ahmed K. Noor and Jeanne M. Peters, EM June 89 p1225-1244.

Wind Induced Vibration of Two Flexible Cylindrical Structures, Le-Chung Shiau, EM Sept. 89 p2089-2098.

Cylindrical shells

Analysis of Long Cantilever Cylindrical Shell Subjected to Wind Loading, K. Chandrashekhara, EM Sept. 89 p2101-2105.

Buckling Behavior of Pressure Loaded Cylindrical Panels, Seishi Yamada and James G. A. Croll, EM Feb. 89 p327-344.

Cylindrical Shell Slice-Beam, Phillip L. Gould, EM May 88 p905-911.

Load Transfer Mechanisms in Wind-Loaded Cylinders, David A. Pecknold, EM Nov. 89 p2353-2367.

Optimal Design for Axisymmetric Cylindrical Shell Buckling, Robert Levy and William R. Spillers, EM Aug. 89 p1683-1690.

Static Buckling of Orthotropic Spherical Shells on Elastic Foundations, Rakesh K. Jain and Yogendra Nath, EM Dec. 89 p2621-2634.

Damage

Energy-Based Coupled Elastoplastic Damage Models at Finite Strains, J. W. Ju, EM Nov. 89 p2507-2525.

Stable States and Paths of Structures with Plasticity or Damage, Zdeněk P. Bažant, EM Dec. 88 p2013-2034.

Damage accumulation

Continuum Damage Theory—Application to Concrete, J. M. Mazars and G. Pijaudier-Cabot, EM Feb. 89 p345-365.

Damage patterns

Continuum Damage of Cement Paste and Mortar as Affected by Porosity and Sand Concentration, Jiann-Wen Ju, Paulo J. M. Monteiro and Ahmed I. Rashed, EM Jan. 89 p105-130.

Damping

Dynamic Synthesis of Nonclassically Damped Substructures, L. E. Suarez and M. P. Singh, EM Jan. 89 p52-70.

Eigenproperties of Classically Damped MDOF Composite Systems, Yan Zhang and Ronald S. Harichandran, EM July 89 p1515-1526.

Eigenproperties of Nonclassically Damped MDOF Composite Systems, Ronald S. Harichandran and Yan Zhang, EM July 89 p1527-1542.

Role of Damping in Anomalous Response to Short Pulse Loading, U. Perego, G. Borino and P. S. Symonds, EM Dec. 89 p2782-2788.

Dams, arch

Nonlinear Seismic Analysis of Arch Dams, Michael J. Dowling and John F. Hall, EM Apr. 89 p768-789.

Dams, concrete

Reliability Analysis of the Mohr Failure Criterion, Harald Kreuzer and Karl V. Bury, EM Mar. 89 p447-464.

Dams, gravity

Hydrodynamic Pressure on Gravity Dams Subjected to Ground Motions, Chong-Shien Tsai and George C. Lee, EM Mar. 89 p598-617.

Data processing techniques

Modified Frequency-Domain Data Processing, J. S. Hwang, K. C. Chang and G. C. Lee, EM Oct. 89 p2333-2339.

Defects

Size Effect in Concrete, David Fanella and Dusan Krajcinovic, EM Apr. 88 p704-715.

Deflection

Dynamic Response of Elastic Plates on Viscoelastic Half Space, R. K. N. D. Rajapakse, EM Sept. 89 p1867-1881.

Engineering Large Deflection Theory for Thick Plates, George Z. Voyiadjis and Shahram Sarkani, EM May 89 p935-951.

Equivalent Systems for Variable Thickness Plates, Demeter G. Fertis and Milos M. Mijatov, EM Oct. 89 p2287-2300.

Finite Strip-Elements for Thick Plate Analysis, Joseph Petrolito, William A. Grice and Bruce W. Golley, EM June 89 p1163-1182.

Large Deflections of Orthotropic Plates Under Pressure, Gordon H. Little, EM Dec. 89 p2601-2620.

Pseudolinear and Equivalent Systems for Large Deflections of Members, Demeter G. Fertis and Sudhakar Pallaki, EM Nov. 89 p2440-2459.

Scheme for Elastics with Snap-Back and Looping, Fumio Fujii, EM Oct. 89 p2166-2181.

Stability of Spherical Shells on Elastic and Viscoelastic Foundations, D. N. Paliwal and R. N. Rai, EM May 89 p1121-1128.

Deformation

Analytical Study on Deformation of Fresh Concrete, Yasuo Tanigawa and Hiroshi Mori, EM Mar. 89 p493-508.

Asymmetrical Buckling of Prestressed Tapered Arches, Amde M. Wolde-Tinsae and Hossein Foadian, EM Sept. 89 p2020-2034.

Equations of Curved Beams, Sundaramoorthy Rajasekaran and S. Padmanabhan, EM May 89 p1094-1111.

Finite Element Analysis of Some Inverse Elasticity Problems, Antoinette Maniatty, Nicholas Zabaras and Kim Stelson, EM June 89 p1303-1317.

Finite Element Modeling of Left Ventricle, K. B. Chandran, V. Wagle, D. Fisher, S. Collins, J. Rumberger, D. D. McPherson and D. J. Skorton, EM Aug. 89 p1821-1827.

Stress Distribution and Deformation of Adhesive-Bonded Laminated Composite Beams, S. Cheng, X. Wei and T. Jiang, EM June 89 p1150-1162.

Structural Analysis of Bimodular Materials, W. W. El-Tahan, G. H. Staab, S. H. Advani and J. K. Lee, EM May 89 p963-981.

Degrees of freedom

Eigenproperties of Classically Damped MDOF Composite Systems, Yan Zhang and Ronald S. Harichandran, EM July 89 p1515-1526.

Eigenproperties of Nonclassically Damped MDOF Composite Systems, Ronald S. Harichandran and Yan Zhang, EM July 89 p1527-1542.

Mode-Superposition Methods for Elastoplastic Systems, Giuseppe Muscolino, EM Oct. 89 p2199-2215.

Role of Damping in Anomalous Response to Short Pulse Loading, U. Perego, G. Borino and P. S. Symonds, EM Dec. 89 p2782-2788.

Design

Basic Problem on Optimal Spatial Cable Layout, C. M. Wang and D. Jin, EM May 89 p1115-1120.

Design criteria

Buckling Behavior of Pressure Loaded Cylindrical Panels, Seishi Yamada and James G. A. Croll, EM Feb. 89 p327-344.

Prager-Shield Optimality Criteria for Linear Segmentation, G. I. N. Rozvany, J. Menkenhagen and F. Spengemann, EM Jan. 89 p203-209.

Diffraction

Diffraction of SV Waves by Circular Canyons of Various Depths, Vincent W. Lee and Hong Cao, EM Sept. 89 p2035-2056.

Diffusion

Diffusion in Gas Under Constant Pressure Drop, I. A. Kholeif and A. A. Hassan, EM Sept. 89 p1951-1959.

Digital techniques

Simulation of Seismic Ground Motion Using Stochastic Waves, George Deodatis and Masanobu Shinozuka, EM Dec. 89 p2723-2737.

Dilatancy

Constitutive Model and Finite Element Procedure for Dilatant Contact Problems, Michael E. Plesha, Roberto Ballarini and Atul Parulekar, EM Dec. 89 p2649-2668.

Nonassociated Flow and Stability of Granular Materials, Poul V. Lade, Richard B. Nelson and Y. Marvin Ito, EM Sept. 87 p1302-1318.

Discharge coefficients

Finite Analytic Solution of Flow Over Spillways, Wei Li, Qi Xie and Ching Jen Chen, EM Dec. 89 p2635-2648.

Dispersion

Motions of Small Rigid Spheres in Simulated Random Velocity Field, Hadj Ounis and Goodarz Ahmadi, EM Oct. 89 p2107-2121.

Displacement

Axisymmetric Vibration of Disk Resting on Saturated Layered Half-Space, A. J. Philippacopoulos, EM Oct. 89 p2301-2322.

Buckling Loads of Columns with Varying Cross Sections, Y. Z. Chen, Y. K. Cheung and J. R. Xie, EM Mar. 89 p662-667.

Scheme for Elasticas with Snap-Back and Looping, Fumio Fujii, EM Oct. 89 p2166-2181.

Displacements

Role of Damping in Anomalous Response to Short Pulse Loading, U. Perego, G. Borino and P. S. Symonds, EM Dec. 89 p2782-2788.

Domes, structural

Asymmetrical Buckling of Prestressed Tapered Arches, Amde M. Wolde-Tinsae and Hossein Foadian, EM Sept. 89 p2020-2034.

Drag

Blockage Correction for Sharp-Edged Bluff Bodies, A. S. Ramamurthy, R. Balachandar and Diep Ngoc Vo, EM July 89 p1569-1576.

Drag coefficient

Blockage Correction for Sharp-Edged Bluff Bodies, A. S. Ramamurthy, R. Balachandar and Diep Ngoc Vo, EM July 89 p1569-1576.

Ductility

Inelastic Torsional Response of a Single Story Framed Structure, B. K. Raghu Prasad and K. S. Jagadish, EM Aug. 89 p1782-1797.

Ductility

Biaxial Tension Stiffening Due to Generally Oriented Reinforcing Layers, R. A. Link, A. E. Elwi and A. Scanlon, EM Aug. 89 p1647-1662.

Inelastic Buckling of Reinforcing Bars, S. T. Mau and Mounir El-Mabsout, EM Jan. 89 p1-17.

Size Effects on Strength, Toughness and Ductility, Alberto Carpinteri, EM July 89 p1375-1392.

Dynamic analysis

Dynamic Synthesis of Nonclassically Damped Substructures, L. E. Suarez and M. P. Singh, EM Jan. 89 p52-70.

Dynamic loads

Point Loads in Cross-Anisotropic Layered Half-spaces, Sandra H. Seale and Eduardo Kausel, EM Mar. 89 p509-542.

Dynamic models

New Formulation for Vibration Analysis, R. J. Melosh and H. A. Smith, EM Mar. 89 p543-554.

Dynamic response

Antiplane Earthquake Waves in Long Structures, M. I. Todorovska and M. D. Trifunac, EM Dec. 89 p2787-2708.

Characteristics of Response to Nonstationary White Noise: Theory, Takeru Igusa, EM Sept. 89 p1904-1918.

Characteristics of Response to Nonstationary White Noise: Applications, Takeru Igusa, EM Sept. 89 p1919-1934.

Dynamic Response of Elastic Plates on Viscoelastic Half Space, R. K. N. D. Rajapakse, EM Sept. 89 p1867-1881.

Dynamic Triaxial Tests of High-Strength Concrete, J. K. Gran, A. L. Florence and J. D. Colton, EM May 89 p891-904.

Effect of Initial Imperfections on Dynamic Buckling of Shells, Steven W. Kirkpatrick and Bayard S. Holmes, EM May 89 p1075-1093.

Elastodynamic Response of Pile Under Transverse Excitations, Ronald Y. S. Pak and Paul C. Jennings, EM July 87 p1101-1106.

FEM Dynamic Fracture Analysis of Concrete Beams, Jiaji Du, Albert S. Kobayashi and Neil M. Hawkins, EM Oct. 89 p2136-2149.

Inelastic Torsional Response of a Single Story Framed Structure, B. K. Raghu Prasad and K. S. Jagadish, EM Aug. 89 p1782-1797.

Influence Coefficients for Dynamic Response of Foundations, Hong Jinru and Sheldon Cherry, EM Nov. 89 p2493-2506.

Mode-Superposition Methods for Elastoplastic Systems, Giuseppe Muscolino, EM Oct. 89 p2199-2215.

New Formulation for Vibration Analysis, R. J. Melosh and H. A. Smith, EM Mar. 89 p543-554.

Response Spectrum Analysis of Class of Torsionally-Coupled Buildings, Reem Hejal and Anil K. Chopra, EM Aug. 89 p1761-1781.

Seismic Waves in Buildings with Shear Walls Or Central Core, M. I. Todorovska and V. W. Lee, EM Dec. 89 p2669-2686.

Torsional Response of Symmetric Structures, Albert N. Lin, EM Feb. 89 p231-246.

Wave Forces on Fixed Offshore Structures in Short-Crested Seas, Hisham Mitwally and Milos Novak, EM Mar. 89 p636-655.

Dynamic stability

Dynamic Stability Analysis by Matrix Function, Tsunemi Shigematsu, Takashi Hara and Mitao Ohga, EM July 87 p1085-1100.

Dynamic Stability of Thin-Walled Structural Members Under Periodic Axial Torque, Tadayoshi Aida, EM Jan. 89 p71-88.

Dynamic structural analysis

Economical Analysis of Combined Dynamical Systems, Taft H. Broome, Jr., EM Oct. 89 p2122-2135.

Dynamics

Aerodynamic Model Tests of Tall Buildings, Daryl W. Boggs and Jon A. Peterka, EM Mar. 89 p618-635.

Analytical Solution to Free Vibration of Sector Plates, Issam E. Harik and Hamid R. Molaghasemi, EM Dec. 89 p2709-2722.

Dynamics of Saturated Rocks. I: Equations of Motion, Dimitri E. Beskos, EM May 89 p982-995.

Dynamics of Saturated Rocks. II: Body Waves, Dimitri E. Beskos, Irene Vgenopoulou and Constantine P. Providakis, EM May 89 p996-1016.

Dynamics of Saturated Rocks. III: Rayleigh Waves, Dimitri E. Beskos, Constantine N. Papadakis and Hyo Seop Woo, EM May 89 p1017-1034.

Earthquake Response Spectrum Analysis of Intake-Outlet Towers, Alok Goyal and Anil K. Chopra, EM July 89 p1413-1433.

Eigenproperties of Nonclassically Damped MDOF Composite Systems, Ronald S. Harichandran and Yan Zhang, EM July 89 p1527-1542.

Multilayered Finite Element Formulation for Vibration and Stability Analysis of Plates, H. Peter Huttelmaier and Marcelo Epstein, EM Feb. 89 p315-325.

Paradox Unresolved, A. S. Richardson, Jr., EM May 89 p905-912.

Steady State Vibration of Subway-Soil-Building System, T. Balendra, K. H. Chua, K. W. Lo and S. L. Lee, EM Jan. 89 p145-162.

Wave Forces on Fixed Offshore Structures in Short-Crested Seas, Hisham Mitwally and Milos Novak, EM Mar. 89 p636-655.

Wind Response Spectrum, Giovanni Solari, EM Sept. 89 p2057-2073.

Earth reinforcement

Stress Systems in Orthotropic Quarter Plane, M. C. Constantinou and Robin S. Greenleaf, EM Nov. 87 p1720-1738.

Earthquake engineering

Active Optimal Control of Structure Using Optimal Observer, S. Baba, K. Ninoniya and Y. Hayashi, EM Nov. 89 p2564-2581.

Experimental Study of Active Control for MDOF Seismic Structures, L. L. Chung, R. C. Lin, T. T. Soong and A. M. Reinhorn, EM Aug. 89 p1609-1627.

Wind Response Spectrum, Giovanni Solari, EM Sept. 89 p2057-2073.

Earthquake excitation

Adaptive Modeling, Identification, and Control of Dynamic Structural Systems: II. Applications, Erdal Şafak, EM Nov. 89 p2406-2426.

Comparative Study of Base Isolation Systems, Lin Su, Goodarz Ahmadi and Iradj G. Tadjbakhsh, EM Sept. 89 p1976-1992.

Hysteretic Column Under Earthquake Excitations, Ismail I. Orabi, Goodarz Ahmadi and Lin Su, EM Jan. 89 p33-51.

Earthquake simulation models

Evolutionary Kanai-Tajimi Earthquake Models, Y. K. Lin and Yan Yong, EM Aug. 87 p1119-1137.

Earthquakes

Antiplane Earthquake Waves in Long Structures, M. I. Todorovska and M. D. Trifunac, EM Dec. 89 p2787-2708.

Dynamic Synthesis of Nonclassically Damped Substructures, L. E. Suarez and M. P. Singh, EM Jan. 89 p52-70.

Earthquake Response Spectrum Analysis of Intake-Outlet Towers, Alok Goyal and Anil K. Chopra, EM July 89 p1413-1433.

Inelastic Torsional Response of a Single Story Framed Structure, B. K. Raghu Prasad and K. S. Jagadish, EM Aug. 89 p1782-1797.

In-Plane Vibrations of x-Braced Frames, Chin-Hao Chang and Guey-Shin Chang, EM Nov. 89 p2368-2385.

Modified Frequency-Domain Data Processing, J. S. Hwang, K. C. Chang and G. C. Lee, EM Oct. 89 p2333-2339.

Nonlinear Seismic Analysis of Arch Dams, Michael J. Dowling and John F. Hall, EM Apr. 89 p768-789.

Response Spectrum Analysis of Class of Torsionally-Coupled Buildings, Reem Hejal and Anil K. Chopra, EM Aug. 89 p1761-1781.

Seismic Waves in Buildings with Shear Walls Or Central Core, M. I. Todorovska and V. W. Lee, EM Dec. 89 p2669-2686.

Simplified Evaluation of Added Hydrodynamic Mass for Intake Towers, Alok Goyal and Anil K. Chopra, EM July 89 p1393-1412.

Effective stress

Energy-Based Coupled Elastoplastic Damage Models at Finite Strains, J. W. Ju, EM Nov. 89 p2507-2525.

Eigenvalues

Buckling Loads of Columns with Varying Cross Sections, Y. Z. Chen, Y. K. Cheung and J. R. Xie, EM Mar. 89 p662-667.

Eigenproperties of Classically Damped MDOF Composite Systems, Yan Zhang and Ronald S. Harichandran, EM July 89 p1515-1526.

Eigenproperties of Nonclassically Damped MDOF Composite Systems, Ronald S. Harichandran and Yan Zhang, EM July 89 p1527-1542.

Lower Bounds for Eigenvalues via Rayleigh's Method, Robert Schmidt, EM June 89 p1365-1370.

Modal Identification of Vibrating Structures Using ARMA Model, Yong Lin Pi and N. C. Mickleborough, EM Oct. 89 p2232-2250.

Eigenvectors

Modal Identification of Vibrating Structures Using ARMA Model, Yong Lin Pi and N. C. Mickleborough, EM Oct. 89 p2232-2250.

Elastic analysis

Circular Plate Analysis by Finite Differences: Energy Approach, Edmund Melerski, EM June 89 p1205-1224.

Elastic Stiffness of Flat Anchor Region at Cracked Geological Interface, A. P. S. Selvadurai, EM Jan. 89 p18-32.

Elastic deformation

Method for Solving Inverse Elastoviscoplastic Problems, Antoinette Maniatty and Nicholas Zabaras, EM Oct. 89 p2216-2231.

Scheme for Elasticas with Snap-Back and Looping, Fumio Fujii, EM Oct. 89 p2166-2181.

Shakedown Analysis in Plastic Design of Steel Structures, Yang Xiaofeng, EM Feb. 89 p304-314.

Elastic foundations

Beam-Column Element on Weak Winkler Foundation, A. Ghani Razaqpur, EM Aug. 89 p1798-1817.

Static Buckling of Orthotropic Spherical Shells on Elastic Foundations, Rakesh K. Jain and Yogendra Nath, EM Dec. 89 p2621-2634.

Elastic properties

Predicting Creep of Nailed Lumber-to-Plywood Joints, Anton Polensek and Sangsik Jang, EM Oct. 89 p2182-2198.

Elastica

Scheme for Elasticas with Snap-Back and Looping, Fumio Fujii, EM Oct. 89 p2166-2181.

Elasticity

Approximate Analysis of Twisted Parallelepiped, Robert Schmidt, EM Jan. 89 p216-220.

Dynamic Response of Elastic Plates on Viscoelastic Half Space, R. K. N. D. Rajapakse, EM Sept. 89 p1867-1881.

Dynamics of Saturated Rocks. I: Equations of Motion, Dimitri E. Beskos, EM May 89 p982-995.

Dynamics of Saturated Rocks. II: Body Waves, Dimitri E. Beskos, Irene Vgenopoulou and Constantine P. Providakis, EM May 89 p996-1016.

Elastodynamic Response of Pile Under Transverse Excitations, Ronald Y. S. Pak and Paul C. Jennings, EM July 87 p1101-1106.

Finite Element Analysis of Some Inverse Elasticity Problems, Antoinette Maniatty, Nicholas Zabaras and Kim Stelson, EM June 89 p1303-1317.

Frictional Punch and Crack in Plane Elasticity, Norio Hasebe, Mikiya Okumura and Takuji Nakamura, EM June 89 p1137-1149.

Model of Finite Strain Creep of Metals, Alan J. Levy and Maciej P. Bieniek, EM July 89 p1472-1487.

Point Loads in Cross-Anisotropic Layered Half-spaces, Sandra H. Seale and Eduardo Kausel, EM Mar. 89 p509-542.

A Posteriori Estimates for the Shear Correction Factors in Multilayered Composite Cylinders, Ahmed K. Noor and Jeanne M. Peters, EM June 89 p1225-1244.

Spheroidal Cavity with Prescribed Asymmetric Displacements in Three-Dimensional Transverse Isotropy, A. H. Zureick, EM Nov. 89 p2427-2439.

Stress Distribution and Deformation of Adhesive-Bonded Laminated Composite Beams, S. Cheng, X. Wei and T. Jiang, EM June 89 p1150-1162.

Stress Interference in a Transversely Isotropic Body Under Axisymmetric Loading, S. M. Heinrich and J. -Y. Wang, EM Mar. 89 p555-577.

Tension Buckling of Rectangular Sheets Due to Concentrated Forces, Arthur W. Leissa and Essam F. Ayoub, EM Dec. 89 p2749-2762.

Elastoplasticity

Application of Orthotropic Failure Criterion to Wood, Kaoru Hasebe and Seizou Usuki, EM Apr. 89 p867-872.

Energy-Based Coupled Elastoplastic Damage Models at Finite Strains, J. W. Ju, EM Nov. 89 p2507-2525.

Mode-Superposition Methods for Elastoplastic Systems, Giuseppe Muscolino, EM Oct. 89 p2199-2215.

Embedment

Finite Element Model for Curved Embedded Reinforcement, Alaa E. Elwi and Terry M. Hrudey, EM Apr. 89 p740-754.

Torsional Response of Symmetric Structures, Albert N. Lin, EM Feb. 89 p231-246.

Engineering mechanics

Lower Bounds for Eigenvalues via Rayleigh's Method, Robert Schmidt, EM June 89 p1365-1370.

Equations of motion

Motions of Small Rigid Spheres in Simulated Random Velocity Field, Hadj Ounis and Goodarz Ahmadi, EM Oct. 89 p2107-2121.

Equilibrium

Stable States and Paths of Structures with Plasticity or Damage, Zdeněk P. Bažant, EM Dec. 88 p2013-2034.

Equipment

Floor Spectra With Equipment-Structure-Equipment Interaction Effects, Luis E. Suarez and Mahendra P. Singh, EM Feb. 89 p247-246.

Equivalence

Equivalent Systems for Variable Thickness Plates, Demeter G. Fertis and Milos M. Mijatov, EM Oct. 89 p2287-2300.

Error analysis

Error Estimation for Boundary Element Analysis, Joseph J. Rencis and Kwo-Yih Jong, EM Sept. 89 p1993-2010.

Errors

Error Estimation for Boundary Element Analysis, Joseph J. Rencis and Kwo-Yih Jong, EM Sept. 89 p1993-2010.

Modified Frequency-Domain Data Processing, J. S. Hwang, K. C. Chang and G. C. Lee, EM Oct. 89 p2333-2339.

Excitation

Equivalent Linearization Method in Nonlinear FEM, Ion Simulescu, Takashi Mochio and Masanobu Shinozuka, EM Mar. 89 p475-492.

Modal Identification of Vibrating Structures Using ARMA Model, Yong Lin Pi and N. C. Mickleborough, EM Oct. 89 p2232-2250.

Experimental data

Free-Surface Flow Produced by Accelerating Vertical Cylinder, Keh-Han Wang and Allen T. Chwang, EM July 89 p1559-1566.

Experimentation

Experimental Study of Active Control for MDOF Seismic Structures, L. L. Chung, R. C. Lin, T. T. Soong and A. M. Reinhorn, EM Aug. 89 p1609-1627.

Failures

Constitutive Equations for Concrete in Failure State, R. de Boer and H. T. Dresenkamp, EM Aug. 89 p1591-1608.

Model of Finite Strain Creep of Metals, Alan J. Levy and Maciej P. Bieniek, EM July 89 p1472-1487.

Parametric Sensitivity in First Order Reliability Theory, Peter Bjerager and Steen Krenk, EM July 89 p1577-1582.

Plastic Reliability Analysis by Directional Simulation, Ove Ditlevsen and Peter Bjerager, EM June 89 p1347-1362.

Reliability Analysis of the Mohr Failure Criterion, Harald Kreuzer and Karl V. Bury, EM Mar. 89 p447-464.

Smooth Limit Surfaces for Metals, Concrete, and Geotechnical Materials, Howard L. Schreyer, EM Sept. 89 p1960-1975.

Failures, investigations

Analysis of Large-Diameter Fabricated Steel Tubes Under Transverse Shear, Vasile G. Roman and Alaa E. Elwi, EM Dec. 89 p2587-2600.

Fatigue life

Effect of Length on Fatigue Life of Cables, J. L. Bogdanoff and F. Kozin, EM June 87 p925-940.

Effect of Length on Fatigue Life of Long Thin Continuous Components, J. L. Bogdanoff and F. Kozin, EM July 89 p1441-1457.

Effect of Length on Fatigue Life of Cables, J. L. Bogdanoff and F. Kozin, EM June 87 p925-940.

Fiber composites

Spheroidal Cavity with Prescribed Asymmetric Displacements in Three-Dimensional Transverse Isotropy, A. H. Zureick, EM Nov. 89 p2427-2439.

Fiber reinforced materials

Spheroidal Cavity with Prescribed Asymmetric Displacements in Three-Dimensional Transverse Isotropy, A. H. Zureick, EM Nov. 89 p2427-2439.

Finite difference

Pressure Distribution in Radial Flow Between Disks, P. M. Li, S. A. Mirza-rProf. and S. Lin, EM Jan. 89 p210-215.

Finite differences

Circular Plate Analysis by Finite Differences: Energy Approach, Edmund Melerski, EM June 89 p1205-1224.

Finite element method

Analysis of R/C Panels Using Different Concrete Models, Michael A. Crisfield and John Wills, EM Mar. 89 p578-597.

Analytical Study on Deformation of Fresh Concrete, Yasuo Tanigawa and Hiroshi Mori, EM Mar. 89 p493-508.

Constitutive Model and Finite Element Procedure for Dilatant Contact Problems, Michael E. Plesha, Roberto Ballarini and Atul Parulekar, EM Dec. 89 p2649-2668.

Continuum Damage Theory—Application to Concrete, J. M. Mazars and G. Pijaudier-Cabot, EM Feb. 89 p345-365.

Equivalent Linearization Method in Nonlinear FEM, Ion Simulescu, Takashi Mochio and Masanobu Shinozuka, EM Mar. 89 p475-492.

Finite Element Analysis of Orthogonally Stiffened Annular Sector Plates, Alavandi Bhimaraddi, Peter J. Moss and Athol J. Carr, EM Sept. 89 p2074-2088.

Finite Element Analysis of Some Inverse Elasticity Problems, Antoinette Maniatty, Nicholas Zabaras and Kim Stelson, EM June 89 p1303-1317.

Finite Element Modeling of Left Ventricle, K. B. Chandran, V. Wagle, D. Fisher, S. Collins, J. Rumberger, D. D. McPherson and D. J. Skorton, EM Aug. 89 p1821-1827.

Multilayered Finite Element Formulation for Vibration and Stability Analysis of Plates, H. Peter Huttelmaier and Marcelo Epstein, EM Feb. 89 p315-325.

New Formulation for Vibration Analysis, R. J. Melosh and H. A. Smith, EM Mar. 89 p543-554.

Nonlinear Shallow Curved-Beam Finite Element, Z. M. Elias and K. -L. Chen, EM June 88 p1076-1087.

Parametric Solution of Stresses in Beams, A. J. Durelli and B. Ranganayakamma, EM Feb. 89 p401-414.

Reliability of Randomly Imperfect Beam-Columns, D. G. Liaw and T. Y. Yang, EM Oct. 89 p2251-2270.

Response-Surface Approach for Reliability Analysis, Lucia Faravelli, EM Dec. 89 p2763-2781.

Structural Analysis of Bimodular Materials, W. W. El-Tahan, G. H. Staab, S. H. Advani and J. K. Lee, EM May 89 p963-981.

Finite elements

Beam-Column Element on Weak Winkler Foundation, A. Ghani Razaqpur, EM Aug. 89 p1798-1817.

Biaxial Tension Stiffening Due to Generally Oriented Reinforcing Layers, R. A. Link, A. E. Elwi and A. Scanlon, EM Aug. 89 p1647-1662.

Characteristics and Computational Procedure in Softening Plasticity, Kenneth Runesson, Ragnar Larsson and Stein Sture, EM Aug. 89 p1628-1646.

Curved Beam Elements for Nonlinear Analysis, Yeong-Bin Yang, Shy-Rong Kuo and Yunn-Dar Chherng, EM Apr. 89 p840-855.

Effect of Initial Imperfections on Dynamic Buckling of Shells, Steven W. Kirkpatrick and Bayard S. Holmes, EM May 89 p1075-1093.

FEM Dynamic Fracture Analysis of Concrete Beams, Jiaji Du, Albert S. Kobayashi and Neil M. Hawkins, EM Oct. 89 p2136-2149.

Finite Deflections of Sandwich Beams and Plates by Finite Element Method, Husam H. Al-Qarra, EM June 89 p1318-1335.

Finite Element Model for Curved Embedded Reinforcement, Alaa E. Elwi and Terry M. Hrudey, EM Apr. 89 p740-754.

Finite Strip-Elements for Thick Plate Analysis, Joseph Petrolito, William A. Grice and Bruce W. Golley, EM June 89 p1163-1182.

Method for Solving Inverse Elastoviscoplastic Problems, Antoinette Maniatty and Nicholas Zabaras, EM Oct. 89 p2216-2231.

Response-Surface Approach for Reliability Analysis, Lucia Faravelli, EM Dec. 89 p2763-2781.

A Self-Adaptive Model for Structural Softening of Brittle Materials, Alberto Franchi and Francesco Genna, EM July 89 p1543-1558.

Stochastic Finite Element Expansion for Random Media, P. D. Spanos and Roger Ghanem, EM May 89 p1035-1053.

Finite strip method

Analytical Solution to Free Vibration of Sector Plates, Issam E. Harik and Hamid R. Molaghasemi, EM Dec. 89 p2709-2722.

Finite Strip-Elements for Thick Plate Analysis, Joseph Petrolito, William A. Grice and Bruce W. Golley, EM June 89 p1163-1182.

Fissures

Dynamics of Saturated Rocks. I: Equations of Motion, Dimitri E. Beskos, EM May 89 p982-995.

Dynamics of Saturated Rocks. II: Body Waves, Dimitri E. Beskos, Irene Vgenopoulou and Constantine P. Providakis, EM May 89 p996-1016.

Dynamics of Saturated Rocks. III: Rayleigh Waves, Dimitri E. Beskos, Constantine N. Papadakis and Hyo Seop Woo, EM May 89 p1017-1034.

Floating body

"Snaking" of Floating Marine Oil Hose Attached to SPM Buoy, Jim Bree, A. Roy Halliwell and Tom O'Donoghue, EM Feb. 89 p265-284.

Flow

Analytical Study on Deformation of Fresh Concrete, Yasuo Tanigawa and Hiroshi Mori, EM Mar. 89 p493-508.

Boundary Conditions for Planar Granular Flows, Gary C. Pasquarell and Norbert L. Ackermann, EM June 89 p1283-1302.

Constitutive Equations for Concrete in Failure State, R. de Boer and H. T. Dresenkamp, EM Aug. 89 p1591-1608.

Free-Surface Flow Produced by Accelerating Vertical Cylinder, Keh-Han Wang and Allen T. Chwang, EM July 89 p1559-1566.

Stability of Frictional Materials, K. Runesson and S. Sture, EM Aug. 89 p1828-1833.

Fluid dynamics

Determining Hydrodynamic Force on Accelerating Plate in Fluid with Free Surface, Costas Emmanuel Synolakis, EM Nov. 89 p2480-2492.

Diffusion in Gas Under Constant Pressure Drop, I. A. Kholeif and A. A. Hassan, EM Sept. 89 p1951-1959.

Fluid-structure interaction

Blockage Correction for Sharp-Edged Bluff Bodies, A. S. Ramamurthy, R. Balachandar and Diep Ngoc Vo, EM July 89 p1569-1576.

Determining Hydrodynamic Force on Accelerating Plate in Fluid with Free Surface, Costas Emmanuel Synolakis, EM Nov. 89 p2480-2492.

Nonlinear Seismic Analysis of Arch Dams, Michael J. Dowling and John F. Hall, EM Apr. 89 p768-789.

Folded plates

Mixed Variational Formulation for Thin-Walled Beams with Shear Lag, K. K. Koo and Y. K. Cheung, EM Oct. 89 p2271-2286.

Footings

Seismic Response of Strip Footings on Zoned Viscoelastic Soils, Jose Dominguez and Ramon Abascal, EM May 89 p913-934.

Force

Axisymmetric Vibration of Disk Resting on Saturated Layered Half-Space, A. J. Philippacopoulos, EM Oct. 89 p2301-2322.

Tension Buckling of Rectangular Sheets Due to Concentrated Forces, Arthur W. Leissa and Essam F. Ayoub, EM Dec. 89 p2749-2762.

Forced vibration

"Snaking" of Floating Marine Oil Hose Attached to SPM Buoy, Jim Bree, A. Roy Halliwell and Tom O'Donoghue, EM Feb. 89 p265-284.

Foundations

Influence Coefficients for Dynamic Response of Foundations, Hong Jinru and Sheldon Cherry, EM Nov. 89 p2493-2506.

Seismic Response of Strip Footings on Zoned Viscoelastic Soils, Jose Dominguez and Ramon Abascal, EM May 89 p913-934.

Stability of Spherical Shells on Elastic and Viscoelastic Foundations, D. N. Paliwal and R. N. Rai, EM May 89 p1121-1128.

Torsional Response of Symmetric Structures, Albert N. Lin, EM Feb. 89 p231-246.

Fourier series

Cylindrical Shell Slice-Beam, Phillip L. Gould, EM May 88 p905-911.

Fracture mechanics

Constitutive Model and Finite Element Procedure for Dilatant Contact Problems, Michael E. Plesha, Roberto Ballarini and Atul Parulekar, EM Dec. 89 p2649-2668.

Size Effects on Strength, Toughness and Ductility, Alberto Carpinteri, EM July 89 p1375-1392.

Fracture strength

Fracture Energy-Based Plasticity Formulation of Plain Concrete, Eddy Pramono and Kaspar Willam, EM June 89 p1183-1204.

Size Effects on Strength, Toughness and Ductility, Alberto Carpinteri, EM July 89 p1375-1392.

Fractures

Extraction of Constitutive Data from Specimens Undergoing Strain Localization, M. Ortiz, EM Aug. 89 p1748-1760.

Measurement and Description of Tensile Fracture in Granite, J. F. Labuz, S. P. Shah and C. H. Dowding, EM Sept. 89 p1935-1949.

Structural Analysis of Bimodular Materials, W. W. El-Tahan, G. H. Staab, S. H. Advani and J. K. Lee, EM May 89 p963-981.

Framed structures

In-Plane Vibrations of x-Braced Frames, Chin-Hao Chang and Guey-Shin Chang, EM Nov. 89 p2368-2385.

Frames

Plastic Reliability Analysis by Directional Simulation, Ove Ditlevsen and Peter Bjerager, EM June 89 p1347-1362.

Free surfaces

Finite Analytic Solution of Flow Over Spillways, Wei Li, Qi Xie and Ching Jen Chen, EM Dec. 89 p2635-2648.

Free-Surface Flow Produced by Accelerating Vertical Cylinder, Keh-Han Wang and Allen T. Chwang, EM July 89 p1559-1566.

Frequency

Dynamics of Saturated Rocks. II: Body Waves, Dimitri E. Beskos, Irene Vgenopoulou and Constantine P. Providakis, EM May 89 p996-1016.

Dynamics of Saturated Rocks. III: Rayleigh Waves, Dimitri E. Beskos, Constantine N. Papadakis and Hyo Seop Woo, EM May 89 p1017-1034.

Friction

Comparative Study of Base Isolation Systems, Lin Su, Goodarz Ahmadi and Iradj G. Tadjbakhsh, EM Sept. 89 p1976-1992.

Constitutive Model and Finite Element Procedure for Dilatant Contact Problems, Michael E. Plesha, Roberto Ballarini and Atul Parulekar, EM Dec. 89 p2649-2668.

Frictional Punch and Crack in Plane Elasticity, Norio Hasebe, Mikiya Okumura and Takuji Nakamura, EM June 89 p1137-1149.

Upper Bound to Mechanical Power Transmission Losses in Wire Rope, Raymond A. LeClair, EM Sept. 89 p2011-2019.

Friction factor

Stability of Frictional Materials, K. Runesson and S. Sture, EM Aug. 89 p1828-1833.

Functional analysis

Spheroidal Cavity with Prescribed Asymmetric Displacements in Three-Dimensional Transverse Isotropy, A. H. Zureick, EM Nov. 89 p2427-2439.

Gaussian distribution

Contribution of Gaussian Curvature to Strain Energy of Plates, Cheng Zhu and Frank L. DiMaggio, EM July 89 p1434-1440.

Geological anomalies

Average Property in Random Two-State Medium, Wilson H. Tang, Indra Sidi and Robert B. Gilbert, EM Jan. 89 p131-144.

Geometric nonlinearity

Curved Beam Elements for Nonlinear Analysis, Yeong-Bin Yang, Shy-Rong Kuo and Yunn-Dar Chherng, EM Apr. 89 p840-855.

Finite Deflections of Sandwich Beams and Plates by Finite Element Method, Husam H. Al-Qarra, EM June 89 p1318-1335.

Rigid Body Motion Test for Nonlinear Analysis with Beam Elements, Yeong-Bin Yang and Hwa-Thong Chiou, EM Sept. 87 p1404-1419.

Geometry

Theoretical and Experimental Study of Regular Packings of Granules, Ching S. Chang and Anil Misra, EM Apr. 89 p704-720.

Granular materials

Boundary Conditions for Planar Granular Flows, Gary C. Pasquarell and Norbert L. Ackermann, EM June 89 p1283-1302.

Nonassociated Flow and Stability of Granular Materials, Poul V. Lade, Richard B. Nelson and Y. Marvin Ito, EM Sept. 87 p1302-1318.

Simple Mean Free Path Theory for Stresses in a Rapid Granular Flow, Marijan Babić and Hayley H. Shen, EM June 89 p1262-1282.

Theoretical and Experimental Study of Regular Packings of Granules, Ching S. Chang and Anil Misra, EM Apr. 89 p704-720.

Gravitational flow

Finite Analytic Solution of Flow Over Spillways, Wei Li, Qi Xie and Ching Jen Chen, EM Dec. 89 p2635-2648.

Greens function

Axisymmetric Vibration of Disk Resting on Saturated Layered Half-Space, A. J. Philippacopoulos, EM Oct. 89 p2301-2322.

Bounds on Response Variability of Stochastic Systems, George Deodatis and Masanobu Shinozuka, EM Nov. 89 p2543-2563.

Economical Analysis of Combined Dynamical Systems, Taft H. Broome, Jr., EM Oct. 89 p2122-2135.

Point Loads in Cross-Anisotropic Layered Half-spaces, Sandra H. Seale and Eduardo Kausel, EM Mar. 89 p509-542.

Structural Response Variability III, A. Kardara, C. G. Bucher and M. Shinozuka, EM Aug. 89 p1726-1747.

Ground motion

Hydrodynamic Pressure on Gravity Dams Subjected to Ground Motions, Chong-Shien Tsai and George C. Lee, EM Mar. 89 p598-617.

Modified Frequency-Domain Data Processing, J. S. Hwang, K. C. Chang and G. C. Lee, EM Oct. 89 p2333-2339.

Simulation of Seismic Ground Motion Using Stochastic Waves, George Deodatis and Masanobu Shinozuka, EM Dec. 89 p2723-2737.

Gusts

Deterministic Model for Wind-Induced Oscillations of Buildings, Thambirajah Balendra, G. K. Nathan and Kok Hin Kang, EM Jan. 89 p179-199.

Motion Stability of Long-Span Bridges Under Gusty Winds, George Tsiatas and Partha P. Sarkar, EM Feb. 88 p257-276.

Half space

Axisymmetric Vibration of Disk Resting on Saturated Layered Half-Space, A. J. Philippacopoulos, EM Oct. 89 p2301-2322.

Dynamics of Saturated Rocks. III: Rayleigh Waves, Dimitri E. Beskos, Constantine N. Papadakis and Hyo Seop Woo, EM May 89 p1017-1034.

Influence Coefficients for Dynamic Response of Foundations, Hong Jinru and Sheldon Cherry, EM Nov. 89 p2493-2506.

Hardness

Fracture Energy-Based Plasticity Formulation of Plain Concrete, Eddy Pramono and Kaspar Willam, EM June 89 p1183-1204.

High strength concretes

Dynamic Triaxial Tests of High-Strength Concrete, J. K. Gran, A. L. Florence and J. D. Colton, EM May 89 p891-904.

Hydration

Solidification Theory for Concrete Creep—I. Formulation, Zdeněk P. Bažant and Santosh Prasannan, EM Aug. 89 p1691-1703.

Solidification Theory for Concrete Creep II. Verification and Application, Zdeněk P. Bažant and Santosh Prasannan, EM Aug. 89 p1704-1725.

Hydrodynamic pressure

Free-Surface Flow Produced by Accelerating Vertical Cylinder, Keh-Han Wang and Allen T. Chwang, EM July 89 p1559-1566.

Hydrodynamic Pressure on Gravity Dams Subjected to Ground Motions, Chong-Shien Tsai and George C. Lee, EM Mar. 89 p598-617.

Hydrodynamics

Determining Hydrodynamic Force on Accelerating Plate in Fluid with Free Surface, Costas Emmanuel Synolakis, EM Nov. 89 p2480-2492.

Earthquake Response Spectrum Analysis of Intake-Outlet Towers, Alok Goyal and Anil K. Chopra, EM July 89 p1413-1433.

Free-Surface Flow Produced by Accelerating Vertical Cylinder, Keh-Han Wang and Allen T. Chwang, EM July 89 p1559-1566.

Simplified Evaluation of Added Hydrodynamic Mass for Intake Towers, Alok Goyal and Anil K. Chopra, EM July 89 p1393-1412.

Hysteresis

Hysteretic Column Under Earthquake Excitations, Ismail I. Orabi, Goodarz Ahmadi and Lin Su, EM Jan. 89 p33-51.

Hysteretic system

Inelastic Torsional Response of a Single Story Framed Structure, B. K. Raghu Prasad and K. S. Jagadish, EM Aug. 89 p1782-1797.

Identification

Adaptive Modeling, Identification, and Control of Dynamic Structural Systems: II. Applications, Erdal Şfak, EM Nov. 89 p2406-2426.

Adaptive Modeling, Identification, and Control of Dynamic Structural Systems: I. Theory, Erdal Şfak, EM Nov. 89 p2386-2405.

Modal Identification of Vibrating Structures Using ARMA Model, Yong Lin Pi and N. C. Mickleborough, EM Oct. 89 p2232-2250.

Impact tests

FEM Dynamic Fracture Analysis of Concrete Beams, Jiaji Du, Albert S. Kobayashi and Neil M. Hawkins, EM Oct. 89 p2136-2149.

Imperfections

Analysis of Large-Diameter Fabricated Steel Tubes Under Transverse Shear, Vasile G. Roman and Alaa E. Elwi, EM Dec. 89 p2587-2600.

Effect of Initial Imperfections on Dynamic Buckling of Shells, Steven W. Kirkpatrick and Bayard S. Holmes, EM May 89 p1075-1093.

Equations of Curved Beams, Sundaramoorthy Rajasekaran and S. Padmanabhan, EM May 89 p1094-1111.

Inelastic Cyclic Response of Restrained Imperfect Columns, Manolis Papadrakakis and Kostas Loukakis, EM Feb. 88 p295-313.

Influential Mode of Imperfection on Carrying Capacity of Structures, Fumio Nishino and Wibisono Hartono, EM Oct. 89 p2150-2165.

Interaction of Buckling Modes of Panels with Symmetric Cross Section, Q. S. Fan, EM Nov. 89 p2526-2542.

Large Deflections of Orthotropic Plates Under Pressure, Gordon H. Little, EM Dec. 89 p2601-2620.

Optimization of Imperfection-Sensitive Structures, G. V. Palassopoulos, EM Aug. 89 p1663-1682.

Reliability of Randomly Imperfect Beam-Columns, D. G. Liaw and T. Y. Yang, EM Oct. 89 p2251-2270.

Inclusions

A Crack Initiating from Rhombic Rigid Inclusion, Norio Hasebe, Minoru Ueda, Yoshiro Ito and Takuji Nakamura, EM Dec. 89 p2738-2748.

Inelastic action

Chaotic Behavior of Particle on Vibrating Plate, Allen T. Hjelmfelt, Jr., EM July 89 p1458-1471.

Inertia

Pseudolinear and Equivalent Systems for Large Deflections of Members, Demeter G. Fertis and Sudhakar Pallaki, EM Nov. 89 p2440-2459.

Integral equations

Stochastic Finite Element Expansion for Random Media, P. D. Spanos and Roger Ghanem, EM May 89 p1035-1053.

Interactions

Floor Spectra With Equipment-Structure-Equipment Interaction Effects, Luis E. Suarez and Mahendra P. Singh, EM Feb. 89 p247-246.

Internal pressure

Transient Wind-Induced Internal Pressures, Theodore Stathopoulos and Horia D. Luchian, EM July 89 p1501-1514.

Isotropic material

Stability of Antisymmetric Angle-Ply Laminated Plates, A. A. Khdeir, EM May 89 p952-962.

Structural Analysis of Bimodular Materials, W. W. El-Tahan, G. H. Staab, S. H. Advani and J. K. Lee, EM May 89 p963-981.

Isotropy

Spheroidal Cavity with Prescribed Asymmetric Displacements in Three-Dimensional Transverse Isotropy, A. H. Zureick, EM Nov. 89 p2427-2439.

Iteraction

Characteristics and Computational Procedure in Softening Plasticity, Kenneth Runesson, Ragnar Larsson and Stein Sture, EM Aug. 89 p1628-1646.

Iteration

Buckling Loads of Columns with Varying Cross Sections, Y. Z. Chen, Y. K. Cheung and J. R. Xie, EM Mar. 89 p662-667.

Jointed rock

Anisotropic Nature of Jointed Rock Mass Strength, Bernard Amadei and William Z. Savage, EM Mar. 89 p525-542.

Joints

Nonlinear Seismic Analysis of Arch Dams, Michael J. Dowling and John F. Hall, EM Apr. 89 p768-789.

Predicting Creep of Nailed Lumber-to-Plywood Joints, Anton Polensek and Sangsik Jang, EM Oct. 89 p2182-2198.

Joints, bonded

Shear and Normal Stresses in Adhesive Joints, T. M. Roberts, EM Nov. 89 p2460-2479.

Lagrange's equations

Scheme for Elasticas with Snap-Back and Looping, Fumio Fujii, EM Oct. 89 p2166-2181.

Lateral loads

Large Deflections of Orthotropic Plates Under Pressure, Gordon H. Little, EM Dec. 89 p2601-2620.

Lattices

In-Plane Vibrations of x-Braced Frames, Chin-Hao Chang and Guey-Shin Chang, EM Nov. 89 p2368-2385.

Layered soils

Point Loads in Cross-Anisotropic Layered Half-spaces, Sandra H. Seale and Eduardo Kausel, EM Mar. 89 p509-542.

Layout

Basic Problem on Optimal Spatial Cable Layout, C. M. Wang and D. Jin, EM May 89 p1115-1120.

Least squares method

Modal Identification of Vibrating Structures Using ARMA Model, Yong Lin Pi and N. C. Mickleborough, EM Oct. 89 p2232-2250.

Length

Effect of Length on Fatigue Life of Cables, J. L. Bogdanoff and F. Kozin, EM June 87 p925-940.

Effect of Length on Fatigue Life of Long Thin Continuous Components, J. L. Bogdanoff and F. Kozin, EM July 89 p1441-1457.

Effect of Length on Fatigue Life of Cables, J. L. Bogdanoff and F. Kozin, EM June 87 p925-940.

Lift

Wind Induced Vibration of Two Flexible Cylindrical Structures, Le-Chung Shiau, EM Sept. 89 p2089-2098.

Limit design

Smooth Limit Surfaces for Metals, Concrete, and Geotechnical Materials, Howard L. Schreyer, EM Sept. 89 p1960-1975.

Limit states

Parametric Sensitivity in First Order Reliability Theory, Peter Bjerager and Steen Krenk, EM July 89 p1577-1582.

Linear analysis

Axisymmetric Vibration of Disk Resting on Saturated Layered Half-Space, A. J. Philippacopoulos, EM Oct. 89 p2301-2322.

Linear systems

Characteristics of Response to Nonstationary White Noise: Theory, Takeru Igusa, EM Sept. 89 p1904-1918.

Characteristics of Response to Nonstationary White Noise: Applications, Takeru Igusa, EM Sept. 89 p1919-1934.

Load

Equations of Curved Beams, Sundaramoorthy Rajasekaran and S. Padmanabhan, EM May 89 p1094-1111.

Load factors

Beam-Column Element on Weak Winkler Foundation, A. Ghani Razaqpur, EM Aug. 89 p1798-1817.

Inelastic Buckling of Reinforcing Bars, S. T. Mau and Mounir El-Mabsout, EM Jan. 89 p1-17.

Parametric Solution of Stresses in Beams, A. J. Durelli and B. Ranganayakamma, EM Feb. 89 p401-414.

Static Buckling of Orthotropic Spherical Shells on Elastic Foundations, Rakesh K. Jain and Yogendra Nath, EM Dec. 89 p2621-2634.

Load transfer

Load Transfer Mechanisms in Wind-Loaded Cylinders, David A. Pecknold, EM Nov. 89 p2353-2367.

Nonlinear Shallow Curved-Beam Finite Element, Z. M. Elias and K. -L. Chen, EM June 88 p1076-1087.

Loading

Beam-Column Element on Weak Winkler Foundation, A. Ghani Razaqpur, EM Aug. 89 p1798-1817.

Creep Buckling of Cylindrical Shell Under Variable Loading, S. M. Arnold, D. N. Robinson and A. F. Saleeb, EM May 89 p1054-1074.

Role of Damping in Anomalous Response to Short Pulse Loading, U. Perego, G. Borino and P. S. Symonds, EM Dec. 89 p2782-2788.

Loads

Analysis of Long Cantilever Cylindrical Shell Subjected to Wind Loading, K. Chandrashekhara, EM Sept. 89 p2101-2105.

Buckling Loads of Columns with Varying Cross Sections, Y. Z. Chen, Y. K. Cheung and J. R. Xie, EM Mar. 89 p662-667.

Mapping and Synthesis of RAndom Pressure Fields, Ahsan Kareem, EM Oct. 89 p2325-2332.

System Reliability Under Time Varying Loads: I, Y. K. Wen and Y. -C. Chen, EM Apr. 89 p808-823.

System Reliability Under Time Varying Loads: II, Y. K. Wen and Y. -C. Chen, EM Apr. 89 p824-839.

Mapping

Frictional Punch and Crack in Plane Elasticity, Norio Hasebe, Mikiya Okumura and Takuji Nakamura, EM June 89 p1137-1149.

Mapping and Synthesis of RAndom Pressure Fields, Ahsan Kareem, EM Oct. 89 p2325-2332.

Markov process

Stochastic Stability of Bridges Considering Coupled Modes: II, C. G. Bucher and Y. K. Lin, EM Feb. 89 p384-400.

Materials

Smooth Limit Surfaces for Metals, Concrete, and Geotechnical Materials, Howard L. Schreyer, EM Sept. 89 p1960-1975.

Stochastic Finite Element Expansion for Random Media, P. D. Spanos and Roger Ghanem, EM May 89 p1035-1053.

Materials failure

Smooth Limit Surfaces for Metals, Concrete, and Geotechnical Materials, Howard L. Schreyer, EM Sept. 89 p1960-1975.

Materials, properties

Stability of Frictional Materials, K. Runesson and S. Sture, EM Aug. 89 p1828-1833.

Materials tests

Application of Orthotropic Failure Criterion to Wood, Kaoru Hasebe and Seizou Usuki, EM Apr. 89 p867-872.

Mathematical models

Cylindrical Shell Slice-Beam, Phillip L. Gould, EM May 88 p905-911.

Economical Analysis of Combined Dynamical Systems, Taft H. Broome, Jr., EM Oct. 89 p2122-2135.

Evolutionary Kanai-Tajimi Earthquake Models, Y. K. Lin and Yan Yong, EM Aug. 87 p1119-1137.

Microplane Model for Brittle Plastic Material: II. Verification, Zdeněk P. Bažant and Pere C. Prat, EM Oct. 88 p1689-1699.

Microplane Model for Brittle-Plastic Material: I. Theory, Zdeněk Bažant and Pere C. Prat, EM Oct. 88 p1672-1688.

Mathematics

Random Nature of Soil Porosity and Related Properties, Kingsley Harrop-Williams, EM May 89 p1129-1133.

Matrix methods

Dynamic Stability Analysis by Matrix Function, Tsunemi Shigematsu, Takashi Hara and Mitao Ohga, EM July 87 p1085-1100.

Measuring instruments

Paradox Unresolved, A. S. Richardson, Jr., EM May 89 p905-912.

Mechanics

Finite Element Analysis of Some Inverse Elasticity Problems, Antoinette Maniatty, Nicholas Zabaras and Kim Stelson, EM June 89 p1303-1317.

Membranes

Load Transfer Mechanisms in Wind-Loaded Cylinders, David A. Pecknold, EM Nov. 89 p2353-2367.

Metals

Smooth Limit Surfaces for Metals, Concrete, and Geotechnical Materials, Howard L. Schreyer, EM Sept. 89 p1960-1975.

Methodology

Scheme for Elasticas with Snap-Back and Looping, Fumio Fujii, EM Oct. 89 p2166-2181.

Modal analysis

Dynamic Synthesis of Nonclassically Damped Substructures, L. E. Suarez and M. P. Singh, EM Jan. 89 p52-70.

Economical Analysis of Combined Dynamical Systems, Taft H. Broome, Jr., EM Oct. 89 p2122-2135.

Mode-Superposition Methods for Elastoplastic Systems, Giuseppe Muscolino, EM Oct. 89 p2199-2215.

Modal superposition

Mode-Superposition Methods for Elastoplastic Systems, Giuseppe Muscolino, EM Oct. 89 p2199-2215.

Model tests

"Snaking" of Floating Marine Oil Hose Attached to SPM Buoy, Jim Bree, A. Roy Halliwell and Tom O'Donoghue, EM Feb. 89 p265-284.

Modeling

Adaptive Modeling, Identification, and Control of Dynamic Structural Systems: II. Applications, Erdal Şfak, EM Nov. 89 p2406-2426.

Adaptive Modeling, Identification, and Control of Dynamic Structural Systems: I. Theory, Erdal Şfak, EM Nov. 89 p2386-2405.

Models

Biaxial Tension Stiffening Due to Generally Oriented Reinforcing Layers, R. A. Link, A. E. Elwi and A. Scanlon, EM Aug. 89 p1647-1662.

Effect of Length on Fatigue Life of Long Thin Continuous Components, J. L. Bogdanoff and F. Kozin, EM July 89 p1441-1457.

Energy-Based Coupled Elastoplastic Damage Models at Finite Strains, J. W. Ju, EM Nov. 89 p2507-2525.

FEM Dynamic Fracture Analysis of Concrete Beams, Jiaji Du, Albert S. Kobayashi and Neil M. Hawkins, EM Oct. 89 p2136-2149.

Force Oscillator Model for Rectangular Cylinder, Stephen John Callander, EM June 89 p1336-1346.

Load Transfer Mechanisms in Wind-Loaded Cylinders, David A. Pecknold, EM Nov. 89 p2353-2367.

Mechanical Model for Oscillating Water Column with Compressibility, S. Szumko, EM Sept. 89 p1851-1866.

Predicting Creep of Nailed Lumber-to-Plywood Joints, Anton Polensek and Sangsik Jang, EM Oct. 89 p2182-2198.

Role of Damping in Anomalous Response to Short Pulse Loading, U. Perego, G. Borino and P. S. Symonds, EM Dec. 89 p2782-2788.

Torsional Response of Symmetric Structures, Albert N. Lin, EM Feb. 89 p231-246.

Modular structures

Structural Analysis of Bimodular Materials, W. W. El-Tahan, G. H. Staab, S. H. Advani and J. K. Lee, EM May 89 p963-981.

Modulus of elasticity

Pseudolinear and Equivalent Systems for Large Deflections of Members, Demeter G. Fertis and Sudhakar Pallaki, EM Nov. 89 p2440-2459.

Moments

Finite Strip-Elements for Thick Plate Analysis, Joseph Petrolito, William A. Grice and Bruce W. Golley, EM June 89 p1163-1182.

Monte Carlo method

Bounds on Response Variability of Stochastic Systems, George Deodatis and Masanobu Shinozuka, EM Nov. 89 p2543-2563.

Plastic Reliability Analysis by Directional Simulation, Ove Ditlevsen and Peter Bjerager, EM June 89 p1347-1362.

Motion

Chaotic Behavior of Particle on Vibrating Plate, Allen T. Hjelmfelt, Jr., EM July 89 p1458-1471.

Multistory buildings

Response Spectrum Analysis of Class of Torsionally-Coupled Buildings, Reem Hejal and Anil K. Chopra, EM Aug. 89 p1761-1781.

Structural Response Variability III, A. Kardara, C. G. Bucher and M. Shinozuka, EM Aug. 89 p1726-1747.

Nails

Predicting Creep of Nailed Lumber-to-Plywood Joints, Anton Polensek and Sangsik Jang, EM Oct. 89 p2182-2198.

Nonlinear

Nonlinear Seismic Analysis of Arch Dams, Michael J. Dowling and John F. Hall, EM Apr. 89 p768-789.

Nonlinear analysis

Asymmetrical Buckling of Prestressed Tapered Arches, Amde M. Wolde-Tinsae and Hossein Foadian, EM Sept. 89 p2020-2034.

Curved Beam Elements for Nonlinear Analysis, Yeong-Bin Yang, Shy-Rong Kuo and Yunn-Dar Chherng, EM Apr. 89 p840-855.

Equivalent Linearization Method in Nonlinear FEM, Ion Simulescu, Takashi Mochio and Masanobu Shinozuka, EM Mar. 89 p475-492.

Interaction of Buckling Modes of Panels with Symmetric Cross Section, Q. S. Fan, EM Nov. 89 p2526-2542.

Microplane Model for Brittle Plastic Material: II. Verification, Zdeněk P. Bažant and Pere C. Prat, EM Oct. 88 p1689-1699.

Microplane Model for Brittle-Plastic Material: I. Theory, Zdeněk Bažant and Pere C. Prat, EM Oct. 88 p1672-1688.

Nonlinear Shallow Curved-Beam Finite Element, Z. M. Elias and K. -L. Chen, EM June 88 p1076-1087.

Pseudolinear and Equivalent Systems for Large Deflections of Members, Demeter G. Fertis and Sudhakar Pallaki, EM Nov. 89 p2440-2459.

Nonlinear differential equations

Asymmetrical Buckling of Prestressed Tapered Arches, Amde M. Wolde-Tinsae and Hossein Foadian, EM Sept. 89 p2020-2034.

Nonlinear systems

Pseudolinear and Equivalent Systems for Large Deflections of Members, Demeter G. Fertis and Sudhakar Pallaki, EM Nov. 89 p2440-2459.

Numerical analysis

Analysis of Large-Diameter Fabricated Steel Tubes Under Transverse Shear, Vasile G. Roman and Alaa E. Elwi, EM Dec. 89 p2587-2600.

Buckling Loads of Columns with Varying Cross Sections, Y. Z. Chen, Y. K. Cheung and J. R. Xie, EM Mar. 89 p662-667.

Finite Analytic Solution of Flow Over Spillways, Wei Li, Qi Xie and Ching Jen Chen, EM Dec. 89 p2635-2648.

Solidification Theory for Concrete Creep—I. Formulation, Zdeněk P. Bažant and Santosh Prasannan, EM Aug. 89 p1691-1703.

Solidification Theory for Concrete Creep II. Verification and Application, Zdeněk P. Bažant and Santosh Prasannan, EM Aug. 89 p1704-1725.

Offshore engineering

"Snaking" of Floating Marine Oil Hose Attached to SPM Buoy, Jim Bree, A. Roy Halliwell and Tom O'Donoghue, EM Feb. 89 p265-284.

Wave Forces on Fixed Offshore Structures in Short-Crested Seas, Hisham Mitwally and Milos Novak, EM Mar. 89 p636-655.

Offshore structures

In-Plane Vibrations of x-Braced Frames, Chin-Hao Chang and Guey-Shin Chang, EM Nov. 89 p2368-2385.

Optimal control methods

Active Optimal Control of Structure Using Optimal Observer, S. Baba, K. Ninoniya and Y. Hayashi, EM Nov. 89 p2564-2581.

Optimal design

Basic Problem on Optimal Spatial Cable Layout, C. M. Wang and D. Jin, EM May 89 p1115-1120.

Optimal Design for Axisymmetric Cylindrical Shell Buckling, Robert Levy and William R. Spillers, EM Aug. 89 p1683-1690.

Optimization of Imperfection-Sensitive Structures, G. V. Palassopoulos, EM Aug. 89 p1663-1682.

Prager-Shield Optimality Criteria for Linear Segmentation, G. I. N. Rozvany, J. Menkenhagen and F. Spengemann, EM Jan. 89 p203-209.

Optimization

Influential Mode of Imperfection on Carrying Capacity of Structures, Fumio Nishino and Wibisono Hartono, EM Oct. 89 p2150-2165.

Optimal Design for Axisymmetric Cylindrical Shell Buckling, Robert Levy and William R. Spillers, EM Aug. 89 p1683-1690.

Orthotropic

Static Buckling of Orthotropic Spherical Shells on Elastic Foundations, Rakesh K. Jain and Yogendra Nath, EM Dec. 89 p2621-2634.

Orthotropic plate

Large Deflections of Orthotropic Plates Under Pressure, Gordon H. Little, EM Dec. 89 p2601-2620.

Oscillations

Force Oscillator Model for Rectangular Cylinder, Stephen John Callander, EM June 89 p1336-1346.

Mechanical Model for Oscillating Water Column with Compressibility, S. Szumko, EM Sept. 89 p1851-1866.

Nonlinear Oscillations in Rectangular Tanks, T. G. Lepelletier and F. Raichlen, EM Jan. 88 p1-23.

Oscillators

Characteristics of Response to Nonstationary White Noise: Theory, Takeru Igusa, EM Sept. 89 p1904-1918.

Characteristics of Response to Nonstationary White Noise: Applications, Takeru Igusa, EM Sept. 89 p1919-1934.

Economical Analysis of Combined Dynamical Systems, Taft H. Broome, Jr., EM Oct. 89 p2122-2135.

Panels

Interaction of Buckling Modes of Panels with Symmetric Cross Section, Q. S. Fan, EM Nov. 89 p2526-2542.

Parameters

Modal Identification of Vibrating Structures Using ARMA Model, Yong Lin Pi and N. C. Mickleborough, EM Oct. 89 p2232-2250.

Parametric Solution of Stresses in Beams, A. J. Durelli and B. Ranganayakamma, EM Feb. 89 p401-414.

Particle distribution

Diffusion in Gas Under Constant Pressure Drop, I. A. Kholeif and A. A. Hassan, EM Sept. 89 p1951-1959.

Particle motion

Chaotic Behavior of Particle on Vibrating Plate, Allen T. Hjelmfelt, Jr., EM July 89 p1458-1471.

Particles

Diffusion in Gas Under Constant Pressure Drop, I. A. Kholeif and A. A. Hassan, EM Sept. 89 p1951-1959.

Motions of Small Rigid Spheres in Simulated Random Velocity Field, Hadj Ounis and Goodarz Ahmadi, EM Oct. 89 p2107-2121.

Passive control

Comparative Study of Base Isolation Systems, Lin Su, Goodarz Ahmadi and Iradj G. Tadjbakhsh, EM Sept. 89 p1976-1992.

Permeability

Dynamics of Saturated Rocks. II: Body Waves, Dimitri E. Beskos, Irene Vgenopoulou and Constantine P. Providakis, EM May 89 p996-1016.

Dynamics of Saturated Rocks. III: Rayleigh Waves, Dimitri E. Beskos, Constantine N. Papadakis and Hyo Seop Woo, EM May 89 p1017-1034.

Phase angles

Diffraction of SV Waves by Circular Canyons of Various Depths, Vincent W. Lee and Hong Cao, EM Sept. 89 p2035-2056.

Photoelasticity

Parametric Solution of Stresses in Beams, A. J. Durelli and B. Ranganayakamma, EM Feb. 89 p401-414.

Plastic analysis

Beam on Partially Yielded Foundation, Shoji E. Yamada, EM Feb. 88 p353-363.

Inelastic Cyclic Response of Restrained Imperfect Columns, Manolis Papadrakakis and Kostas Loukakis, EM Feb. 88 p295-313.

Microplane Model for Brittle Plastic Material: II. Verification, Zdeněk P. Bažant and Pere C. Prat, EM Oct. 88 p1689-1699.

Microplane Model for Brittle-Plastic Material: I. Theory, Zdeněk Bažant and Pere C. Prat, EM Oct. 88 p1672-1688.

Plastic deformations

Role of Damping in Anomalous Response to Short Pulse Loading, U. Perego, G. Borino and P. S. Symonds, EM Dec. 89 p2782-2788.

Plastic design

Prager-Shield Optimality Criteria for Linear Segmentation, G. I. N. Rozvany, J. Menkenhagen and F. Spengemann, EM Jan. 89 p203-209.

Shakedown Analysis in Plastic Design of Steel Structures, Yang Xiaofeng, EM Feb. 89 p304-314.

Plastic properties

Predicting Creep of Nailed Lumber-to-Plywood Joints, Anton Polensek and Sangsik Jang, EM Oct. 89 p2182-2198.

Plastic theory

Plastic Reliability Analysis by Directional Simulation, Ove Ditlevsen and Peter Bjerager, EM June 89 p1347-1362.

Plasticity

Characteristics and Computational Procedure in Softening Plasticity, Kenneth Runesson, Ragnar Larsson and Stein Sture, EM Aug. 89 p1628-1646.

Energy-Based Coupled Elastoplastic Damage Models at Finite Strains, J. W. Ju, EM Nov. 89 p2507-2525.

Fracture Energy-Based Plasticity Formulation of Plain Concrete, Eddy Pramono and Kaspar Willam, EM June 89 p1183-1204.

Prager-Shield Optimality Criteria for Linear Segmentation, G. I. N. Rozvany, J. Menkenhagen and F. Spengemann, EM Jan. 89 p203-209.

Rate-Dependent Material Model for Structural Steel, K. C. Chang, K. Sugiura and G. C. Lee, EM Mar. 89 p465-474.

Role of Damping in Anomalous Response to Short Pulse Loading, U. Perego, G. Borino and P. S. Symonds, EM Dec. 89 p2782-2788.

Yield Function for Soil with Anistropic Fabric, Masanobu Oda and Hideo Nakayama, EM Jan. 89 p89-104.

Plates

Analytical Solution to Free Vibration of Sector Plates, Issam E. Harik and Hamid R. Molaghasemi, EM Dec. 89 p2709-2722.

Bending of Circular Plates Supported at Number of Points, J. Raamachandran and G. C. Bhaskara Reddy, EM Feb. 89 p437-441.

Circular Plate Analysis by Finite Differences: Energy Approach, Edmund Melerski, EM June 89 p1205-1224.

Contribution of Gaussian Curvature to Strain Energy of Plates, Cheng Zhu and Frank L. DiMaggio, EM July 89 p1434-1440.

Determining Hydrodynamic Force on Accelerating Plate in Fluid with Free Surface, Costas Emmanuel Synolakis, EM Nov. 89 p2480-2492.

Dynamic Response of Elastic Plates on Viscoelastic Half Space, R. K. N. D. Rajapakse, EM Sept. 89 p1867-1881.

Dynamic Stability Analysis by Matrix Function, Tsunemi Shigematsu, Takashi Hara and Mitao Ohga, EM July 87 p1085-1100.

Engineering Large Deflection Theory for Thick Plates, George Z. Voyiadjis and Shahram Sarkani, EM May 89 p935-951.

Equivalent Systems for Variable Thickness Plates, Demeter G. Fertis and Milos M. Mijatov, EM Oct. 89 p2287-2300.

Finite Element Analysis of Orthogonally Stiffened Annular Sector Plates, Alavandi Bhimaraddi, Peter J. Moss and Athol J. Carr, EM Sept. 89 p2074-2088.

Finite Strip-Elements for Thick Plate Analysis, Joseph Petrolito, William A. Grice and Bruce W. Golley, EM June 89 p1163-1182.

Mode I Fracture in Concrete Using Center-Cracked Plate Specimens, Manuel A. Alvarado, Surendra P. Shah and Reji John, EM Feb. 89 p366-383.

Multilayered Finite Element Formulation for Vibration and Stability Analysis of Plates, H. Peter Huttelmaier and Marcelo Epstein, EM Feb. 89 p315-325.

Stability of Antisymmetric Angle-Ply Laminated Plates, A. A. Khdeir, EM May 89 p952-962.

Tension Buckling of Rectangular Sheets Due to Concentrated Forces, Arthur W. Leissa and Essam F. Ayoub, EM Dec. 89 p2749-2762.

Pneumatic systems

Mapping and Synthesis of RAndom Pressure Fields, Ahsan Kareem, EM Oct. 89 p2325-2332.

Porosity

Continuum Damage of Cement Paste and Mortar as Affected by Porosity and Sand Concentration, Jiann-Wen Ju, Paulo J. M. Monteiro and Ahmed I. Rashed, EM Jan. 89 p105-130.

Dynamics of Saturated Rocks. I: Equations of Motion, Dimitri E. Beskos, EM May 89 p982-995.

Dynamics of Saturated Rocks. II: Body Waves, Dimitri E. Beskos, Irene Vgenopoulou and Constantine P. Providakis, EM May 89 p996-1016.

Dynamics of Saturated Rocks. III: Rayleigh Waves, Dimitri E. Beskos, Constantine N. Papadakis and Hyo Seop Woo, EM May 89 p1017-1034.

Postbuckling behavior

Buckling and Postbuckling Analyses of Struts with Discrete Supports, S. T. Mau, EM Apr. 89 p721-739.

Buckling and Postbuckling of Heavy Columns, C. Y. Wang, EM Aug. 87 p1229-1233.

Inelastic Buckling of Reinforcing Bars, S. T. Mau and Mounir El-Mabsout, EM Jan. 89 p1-17.

Power loss

Upper Bound to Mechanical Power Transmission Losses in Wire Rope, Raymond A. LeClair, EM Sept. 89 p2011-2019.

Power spectrum analysis

Simulation of Seismic Ground Motion Using Stochastic Waves, George Deodatis and Masanobu Shinozuka, EM Dec. 89 p2723-2737.

Predictions

New Method for Prediction of Extreme Wind Speeds, G. R. Dargahi-Noubary, EM Apr. 89 p859-866.

Predictive control

Characteristics and Computational Procedure in Softening Plasticity, Kenneth Runesson, Ragnar Larsson and Stein Sture, EM Aug. 89 p1628-1646.

Experimental Digital Control of Structures, J. Rodellar, L. L. Chung, T. T. Soong and A. M. Reinhorn, EM June 89 p1245-1261.

Pressure distribution

Determining Hydrodynamic Force on Accelerating Plate in Fluid with Free Surface, Costas Emmanuel Synolakis, EM Nov. 89 p2480-2492.

Pressure Distribution in Radial Flow Between Disks, P. M. Li, S. A. Mirza-rProf. and S. Lin, EM Jan. 89 p210-215.

Pressures

Diffusion in Gas Under Constant Pressure Drop, I. A. Kholeif and A. A. Hassan, EM Sept. 89 p1951-1959.

Mapping and Synthesis of RAndom Pressure Fields, Ahsan Kareem, EM Oct. 89 p2325-2332.

Role of Damping in Anomalous Response to Short Pulse Loading, U. Perego, G. Borino and P. S. Symonds, EM Dec. 89 p2782-2788.

Prestressing

Asymmetrical Buckling of Prestressed Tapered Arches, Amde M. Wolde-Tinsae and Hossein Foadian, EM Sept. 89 p2020-2034.

Prisms

Mapping and Synthesis of RAndom Pressure Fields, Ahsan Kareem, EM Oct. 89 p2325-2332.

Probabilistic models

Average Property in Random Two-State Medium, Wilson H. Tang, Indra Sidi and Robert B. Gilbert, EM Jan. 89 p131-144.

Effect of Length on Fatigue Life of Cables, J. L. Bogdanoff and F. Kozin, EM June 87 p925-940.

Probability distribution

New Method for Prediction of Extreme Wind Speeds, G. R. Dargahi-Noubary, EM Apr. 89 p859-866.

Probability theory

Parametric Sensitivity in First Order Reliability Theory, Peter Bjerager and Steen Krenk, EM July 89 p1577-1582.

Plastic Reliability Analysis by Directional Simulation, Ove Ditlevsen and Peter Bjerager, EM June 89 p1347-1362.

Random Nature of Soil Porosity and Related Properties, Kingsley Harrop-Williams, EM May 89 p1129-1133.

System Reliability Under Time Varying Loads: I, Y. K. Wen and Y. -C. Chen, EM Apr. 89 p808-823.

White Noise Processes, Mircea Grigoriu, EM May 87 p757-765.

Problem solving

Error Estimation for Boundary Element Analysis, Joseph J. Rencis and Kwo-Yih Jong, EM Sept. 89 p1993-2010.

Method for Solving Inverse Elastoviscoplastic Problems, Antoinette Maniatty and Nicholas Zabaras, EM Oct. 89 p2216-2231.

Progressive failure

System Reliability Under Time Varying Loads: I, Y. K. Wen and Y. -C. Chen, EM Apr. 89 p808-823.

System Reliability Under Time Varying Loads: II, Y. K. Wen and Y. -C. Chen, EM Apr. 89 p824-839.

Radial flow

Pressure Distribution in Radial Flow Between Disks, P. M. Li, S. A. Mirza-rProf. and S. Lin, EM Jan. 89 p210-215.

Random processes

Motions of Small Rigid Spheres in Simulated Random Velocity Field, Hadj Ounis and Goodarz Ahmadi, EM Oct. 89 p2107-2121.

Response-Surface Approach for Reliability Analysis, Lucia Faravelli, EM Dec. 89 p2763-2781.

System Reliability Under Time Varying Loads: I, Y. K. Wen and Y. -C. Chen, EM Apr. 89 p808-823.

System Reliability Under Time Varying Loads: II, Y. K. Wen and Y. -C. Chen, EM Apr. 89 p824-839.

Random variables

Reliability of Randomly Imperfect Beam-Columns, D. G. Liaw and T. Y. Yang, EM Oct. 89 p2251-2270.

Structural Response Variability III, A. Kardara, C. G. Bucher and M. Shinozuka, EM Aug. 89 p1726-1747.

Random vibration

Characteristics of Response to Nonstationary White Noise: Theory, Takeru Igusa, EM Sept. 89 p1904-1918.

Characteristics of Response to Nonstationary White Noise: Applications, Takeru Igusa, EM Sept. 89 p1919-1934.

Evolutionary Kanai-Tajimi Earthquake Models, Y. K. Lin and Yan Yong, EM Aug. 87 p1119-1137.

White Noise Processes, Mircea Grigoriu, EM May 87 p757-765.

Rayleigh waves

Dynamics of Saturated Rocks. III: Rayleigh Waves, Dimitri E. Beskos, Constantine N. Papadakis and Hyo Seop Woo, EM May 89 p1017-1034.

Recursive functions

Adaptive Modeling, Identification, and Control of Dynamic Structural Systems: I. Theory, Erdal Şfak, EM Nov. 89 p2386-2405.

Redundancy

System Reliability Under Time Varying Loads: II, Y. K. Wen and Y. -C. Chen, EM Apr. 89 p824-839.

Reinforcement

Finite Element Model for Curved Embedded Reinforcement, Alaa E. Elwi and Terry M. Hrudey, EM Apr. 89 p740-754.

Inelastic Buckling of Reinforcing Bars, S. T. Mau and Mounir El-Mabsout, EM Jan. 89 p1-17.

Reliability

Average Property in Random Two-State Medium, Wilson H. Tang, Indra Sidi and Robert B. Gilbert, EM Jan. 89 p131-144.

Stochastic Finite Element Expansion for Random Media, P. D. Spanos and Roger Ghanem, EM May 89 p1035-1053.

System Reliability Under Time Varying Loads: I, Y. K. Wen and Y. -C. Chen, EM Apr. 89 p808-823.

System Reliability Under Time Varying Loads: II, Y. K. Wen and Y. -C. Chen, EM Apr. 89 p824-839.

Reliability analysis

Parametric Sensitivity in First Order Reliability Theory, Peter Bjerager and Steen Krenk, EM July 89 p1577-1582.

Reliability Analysis of the Mohr Failure Criterion, Harald Kreuzer and Karl V. Bury, EM Mar. 89 p447-464.

Response-Surface Approach for Reliability Analysis, Lucia Faravelli, EM Dec. 89 p2763-2781.

Research

Finite Element Modeling of Left Ventricle, K. B. Chandran, V. Wagle, D. Fisher, S. Collins, J. Rumberger, D. D. McPherson and D. J. Skorton, EM Aug. 89 p1821-1827.

Residual stress

Analysis of Large-Diameter Fabricated Steel Tubes Under Transverse Shear, Vasile G. Roman and Alaa E. Elwi, EM Dec. 89 p2587-2600.

Response spectra

Comparative Study of Base Isolation Systems, Lin Su, Goodarz Ahmadi and Iradj G. Tadjbakhsh, EM Sept. 89 p1976-1992.

Floor Spectra With Equipment-Structure-Equipment Interaction Effects, Luis E. Suarez and Mahendra P. Singh, EM Feb. 89 p247-246.

Inelastic Torsional Response of a Single Story Framed Structure, B. K. Raghu Prasad and K. S. Jagadish, EM Aug. 89 p1782-1797.

Response Spectrum Analysis of Class of Torsionally-Coupled Buildings, Reem Hejal and Anil K. Chopra, EM Aug. 89 p1761-1781.

Wind Response Spectrum, Giovanni Solari, EM Sept. 89 p2057-2073.

Response time

Motions of Small Rigid Spheres in Simulated Random Velocity Field, Hadj Ounis and Goodarz Ahmadi, EM Oct. 89 p2107-2121.

Responses

Bounds on Response Variability of Stochastic Systems, George Deodatis and Masanobu Shinozuka, EM Nov. 89 p2543-2563.

Retaining walls

Stress Systems in Orthotropic Quarter Plane, M. C. Constantinou and Robin S. Greenleaf, EM Nov. 87 p1720-1738.

Rheology

Analytical Study on Deformation of Fresh Concrete, Yasuo Tanigawa and Hiroshi Mori, EM Mar. 89 p493-508.

Rigid-body dynamics

Influence Coefficients for Dynamic Response of Foundations, Hong Jinru and Sheldon Cherry, EM Nov. 89 p2493-2506.

Rigid Body Motion Test for Nonlinear Analysis with Beam Elements, Yeong-Bin Yang and Hwa-Thong Chiou, EM Sept. 87 p1404-1419.

Rings

Equations of Curved Beams, Sundaramoorthy Rajasekaran and S. Padmanabhan, EM May 89 p1094-1111.

Rock masses

Anisotropic Nature of Jointed Rock Mass Strength, Bernard Amadei and William Z. Savage, EM Mar. 89 p525-542.

Rocks

Dynamics of Saturated Rocks. I: Equations of Motion, Dimitri E. Beskos, EM May 89 p982-995.

Dynamics of Saturated Rocks. II: Body Waves, Dimitri E. Beskos, Irene Vgenopoulou and Constantine P. Providakis, EM May 89 p996-1016.

Dynamics of Saturated Rocks. III: Rayleigh Waves, Dimitri E. Beskos, Constantine N. Papadakis and Hyo Seop Woo, EM May 89 p1017-1034.

Measurement and Description of Tensile Fracture in Granite, J. F. Labuz, S. P. Shah and C. H. Dowding, EM Sept. 89 p1935-1949.

Roofs

Mixed Variational Formulation for Thin-Walled Beams with Shear Lag, K. K. Koo and Y. K. Cheung, EM Oct. 89 p2271-2286.

Rotation

Buckling Loads of Columns with Varying Cross Sections, Y. Z. Chen, Y. K. Cheung and J. R. Xie, EM Mar. 89 p662-667.

Rotational flow

Finite Analytic Solution of Flow Over Spillways, Wei Li, Qi Xie and Ching Jen Chen, EM Dec. 89 p2635-2648.

Safety

Structural Response Variability III, A. Kardara, C. G. Bucher and M. Shinozuka, EM Aug. 89 p1726-1747.

Safety analysis

Earthquake Response Spectrum Analysis of Intake-Outlet Towers, Alok Goyal and Anil K. Chopra, EM July 89 p1413-1433.

Safety factors

Reliability Analysis of the Mohr Failure Criterion, Harald Kreuzer and Karl V. Bury, EM Mar. 89 p447-464.

Structural Response Variability III, A. Kardara, C. G. Bucher and M. Shinozuka, EM Aug. 89 p1726-1747.

Sand

Continuum Damage of Cement Paste and Mortar as Affected by Porosity and Sand Concentration, Jiann-Wen Ju, Paulo J. M. Monteiro and Ahmed I. Rashed, EM Jan. 89 p105-130.

Nonassociated Flow and Stability of Granular Materials, Poul V. Lade, Richard B. Nelson and Y. Marvin Ito, EM Sept. 87 p1302-1318.

Slip Mechanism-Based Constitutive Model for Granular Soils, Ching S. Chang, Saroj P. Weeraratne and Anil Misra, EM Apr. 89 p790-807.

Yield Function for Soil with Anistropic Fabric, Masanobu Oda and Hideo Nakayama, EM Jan. 89 p89-104.

Sandwich panels

Finite Deflections of Sandwich Beams and Plates by Finite Element Method, Husam H. Al-Qarra, EM June 89 p1318-1335.

Saturation

Axisymmetric Vibration of Disk Resting on Saturated Layered Half-Space, A. J. Philippacopoulos, EM Oct. 89 p2301-2322.

Dynamics of Saturated Rocks. I: Equations of Motion, Dimitri E. Beskos, EM May 89 p982-995.

Dynamics of Saturated Rocks. II: Body Waves, Dimitri E. Beskos, Irene Vgenopoulou and Constantine P. Providakis, EM May 89 p996-1016.

Dynamics of Saturated Rocks. III: Rayleigh Waves, Dimitri E. Beskos, Constantine N. Papadakis and Hyo Seop Woo, EM May 89 p1017-1034.

Effect of Length on Fatigue Life of Long Thin Continuous Components, J. L. Bogdanoff and F. Kozin, EM July 89 p1441-1457.

Secondary systems

Eigenproperties of Nonclassically Damped MDOF Composite Systems, Ronald S. Harichandran and Yan Zhang, EM July 89 p1527-1542.

Seepage

Dynamics of Saturated Rocks. I: Equations of Motion, Dimitri E. Beskos, EM May 89 p982-995.

Seismic analysis

Dynamic Synthesis of Nonclassically Damped Substructures, L. E. Suarez and M. P. Singh, EM Jan. 89 p52-70.

Modified Frequency-Domain Data Processing, J. S. Hwang, K. C. Chang and G. C. Lee, EM Oct. 89 p2333-2339.

Seismic investigations

Measurement and Description of Tensile Fracture in Granite, J. F. Labuz, S. P. Shah and C. H. Dowding, EM Sept. 89 p1935-1949.

Seismic response

Earthquake Response Spectrum Analysis of Intake-Outlet Towers, Alok Goyal and Anil K. Chopra, EM July 89 p1413-1433.

Experimental Digital Control of Structures, J. Rodellar, L. L. Chung, T. T. Soong and A. M. Reinhorn, EM June 89 p1245-1261.

Floor Spectra With Equipment-Structure-Equipment Interaction Effects, Luis E. Suarez and Mahendra P. Singh, EM Feb. 89 p247-246.

Inelastic Torsional Response of a Single Story Framed Structure, B. K. Raghu Prasad and K. S. Jagadish, EM Aug. 89 p1782-1797.

Seismic Response of Strip Footings on Zoned Viscoelastic Soils, Jose Dominguez and Ramon Abascal, EM May 89 p913-934.

Simplified Evaluation of Added Hydrodynamic Mass for Intake Towers, Alok Goyal and Anil K. Chopra, EM July 89 p1393-1412.

Seismic waves

Antiplane Earthquake Waves in Long Structures, M. I. Todorovska and M. D. Trifunac, EM Dec. 89 p2787-2708.

Seismic Waves in Buildings with Shear Walls Or Central Core, M. I. Todorovska and V. W. Lee, EM Dec. 89 p2669-2686.

Simulation of Seismic Ground Motion Using Stochastic Waves, George Deodatis and Masanobu Shinozuka, EM Dec. 89 p2723-2737.

Seismology

Point Loads in Cross-Anisotropic Layered Half-spaces, Sandra H. Seale and Eduardo Kausel, EM Mar. 89 p509-542.

Sensitivity analysis

Parametric Sensitivity in First Order Reliability. Theory, Peter Bjerager and Steen Krenk, EM July 89 p1577-1582.

Shape

Optimal Design for Axisymmetric Cylindrical Shell Buckling, Robert Levy and William R. Spillers, EM Aug. 89 p1683-1690.

Shear deformation

Finite Deflections of Sandwich Beams and Plates by Finite Element Method, Husam H. Al-Qarra, EM June 89 p1318-1335.

A Posteriori Estimates for the Shear Correction Factors in Multilayered Composite Cylinders, Ahmed K. Noor and Jeanne M. Peters, EM June 89 p1225-1244.

Shear lag

Mixed Variational Formulation for Thin-Walled Beams with Shear Lag, K. K. Koo and Y. K. Cheung, EM Oct. 89 p2271-2286.

Shear planes

Microplane Model for Brittle-Plastic Material: I. Theory, Zdeněk Bažant and Pere C. Prat, EM Oct. 88 p1672-1688.

Shear strength

Yield Function for Soil with Anistropic Fabric, Masanobu Oda and Hideo Nakayama, EM Jan. 89 p89-104.

Shear stress

Shear and Normal Stresses in Adhesive Joints, T. M. Roberts, EM Nov. 89 p2460-2479.

Stress Distribution and Deformation of Adhesive-Bonded Laminated Composite Beams, S. Cheng, X. Wei and T. Jiang, EM June 89 p1150-1162.

Shear tests

Predicting Creep of Nailed Lumber-to-Plywood Joints, Anton Polensek and Sangsik Jang, EM Oct. 89 p2182-2198.

Shear walls

Seismic Waves in Buildings with Shear Walls Or Central Core, M. I. Todorovska and V. W. Lee, EM Dec. 89 p2669-2686.

Stiffened Coupled Shear Walls, H. C. Chan and J. S. Kuang, EM Apr. 89 p689-703.

Shear waves

Dynamics of Saturated Rocks. II: Body Waves, Dimitri E. Beskos, Irene Vgenopoulou and Constantine P. Providakis, EM May 89 p996-1016.

Sheaves

Predicting Creep of Nailed Lumber-to-Plywood Joints, Anton Polensek and Sangsik Jang, EM Oct. 89 p2182-2198.

Sheets

Tension Buckling of Rectangular Sheets Due to Concentrated Forces, Arthur W. Leissa and Essam F. Ayoub, EM Dec. 89 p2749-2762.

Shell structures

Buckling Behavior of Pressure Loaded Cylindrical Panels, Seishi Yamada and James G. A. Croll, EM Feb. 89 p327-344.

Effect of Initial Imperfections on Dynamic Buckling of Shells, Steven W. Kirkpatrick and Bayard S. Holmes, EM May 89 p1075-1093.

Shells

Analysis of Large-Diameter Fabricated Steel Tubes Under Transverse Shear, Vasile G. Roman and Alaa E. Elwi, EM Dec. 89 p2587-2600.

Creep Buckling of Cylindrical Shell Under Variable Loading, S. M. Arnold, D. N. Robinson and A. F. Saleeb, EM May 89 p1054-1074.

A Posteriori Estimates for the Shear Correction Factors in Multilayered Composite Cylinders, Ahmed K. Noor and Jeanne M. Peters, EM June 89 p1225-1244.

Shoaling

Mean Flow Circulation Equations for Shoaling and Breaking Waves, Rodney J. Sobey and Robert J. Thieke, EM Feb. 89 p285-303.

Simulation

Simulation of Seismic Ground Motion Using Stochastic Waves, George Deodatis and Masanobu Shinozuka, EM Dec. 89 p2723-2737.

System Reliability Under Time Varying Loads: I, Y. K. Wen and Y. -C. Chen, EM Apr. 89 p808-823.

Simulation models

Finite Element Modeling of Left Ventricle, K. B. Chandran, V. Wagle, D. Fisher, S. Collins, J. Rumberger, D. D. McPherson and D. J. Skorton, EM Aug. 89 p1821-1827.

Optimization of Imperfection-Sensitive Structures, G. V. Palassopoulos, EM Aug. 89 p1663-1682.

Size effect

Extraction of Constitutive Data from Specimens Undergoing Strain Localization, M. Ortiz, EM Aug. 89 p1748-1760.

Size Effect in Concrete, David Fanella and Dusan Krajcinovic, EM Apr. 88 p704-715.

Size Effects on Strength, Toughness and Ductility, Alberto Carpinteri, EM July 89 p1375-1392.

Slabs

Analytical Solution to Free Vibration of Sector Plates, Issam E. Harik and Hamid R. Molaghasemi, EM Dec. 89 p2709-2722.

Slenderness ratio

Inelastic Buckling of Reinforcing Bars, S. T. Mau and Mounir El-Mabsout, EM Jan. 89 p1-17.

Slip

Boundary Conditions for Planar Granular Flows, Gary C. Pasquarell and Norbert L. Ackermann, EM June 89 p1283-1302.

Finite Element Model for Curved Embedded Reinforcement, Alaa E. Elwi and Terry M. Hrudey, EM Apr. 89 p740-754.

Slump

Analytical Study on Deformation of Fresh Concrete, Yasuo Tanigawa and Hiroshi Mori, EM Mar. 89 p493-508.

Softening

Analysis of Mixed-Mode Fracture in Concrete, Jan G. Rots and René de Borst, EM Nov. 87 p1739-1758.

Characteristics and Computational Procedure in Softening Plasticity, Kenneth Runesson, Ragnar Larsson and Stein Sture, EM Aug. 89 p1628-1646.

Measurement of Characteristic Length of Nonlocal Continuum, Zdeněk P. Bažant and Gilles Pijaudier-Cabot, EM Apr. 89 p755-767.

A Self-Adaptive Model for Structural Softening of Brittle Materials, Alberto Franchi and Francesco Genna, EM July 89 p1543-1558.

Soil mechanics

Random Nature of Soil Porosity and Related Properties, Kingsley Harrop-Williams, EM May 89 p1129-1133.

Soil porosity

Random Nature of Soil Porosity and Related Properties, Kingsley Harrop-Williams, EM May 89 p1129-1133.

Soil properties

Average Property in Random Two-State Medium, Wilson H. Tang, Indra Sidi and Robert B. Gilbert, EM Jan. 89 p131-144.

Soil structure

Yield Function for Soil with Anistropic Fabric, Masanobu Oda and Hideo Nakayama, EM Jan. 89 p89-104.

Soil-pile interaction

Elastodynamic Response of Pile Under Transverse Excitations, Ronald Y. S. Pak and Paul C. Jennings, EM July 87 p1101-1106.

Soils

Seismic Response of Strip Footings on Zoned Viscoelastic Soils, Jose Dominguez and Ramon Abascal, EM May 89 p913-934.

Soil-structure interaction

Dynamic Response of Elastic Plates on Viscoelastic Half Space, R. K. N. D. Rajapakse, EM Sept. 89 p1867-1881.

Seismic Response of Strip Footings on Zoned Viscoelastic Soils, Jose Dominguez and Ramon Abascal, EM May 89 p913-934.

Steady State Vibration of Subway-Soil-Building System, T. Balendra, K. H. Chua, K. W. Lo and S. L. Lee, EM Jan. 89 p145-162.

Torsional Response of Symmetric Structures, Albert N. Lin, EM Feb. 89 p231-246.

Solidification

Solidification Theory for Concrete Creep—I. Formulation, Zdeněk P. Bažant and Santosh Prasannan, EM Aug. 89 p1691-1703.

Solidification Theory for Concrete Creep II. Verification and Application, Zdeněk P. Bažant and Santosh Prasannan, EM Aug. 89 p1704-1725.

Spatial analysis

Mapping and Synthesis of RAndom Pressure Fields, Ahsan Kareem, EM Oct. 89 p2325-2332.

Spheres

Spheroidal Cavity with Prescribed Asymmetric Displacements in Three-Dimensional Transverse Isotropy, A. H. Zureick, EM Nov. 89 p2427-2439.

Stability of Spherical Shells on Elastic and Viscoelastic Foundations, D. N. Paliwal and R. N. Rai, EM May 89 p1121-1128.

Spherical shells

Hybrid Analysis of Shallow Spherical Shells, Sameh S. Issa, EM Jan. 88 p65-79.

Spherical Shells

Stability of Spherical Shells on Elastic and Viscoelastic Foundations, D. N. Paliwal and R. N. Rai, EM May 89 p1121-1128.

Spherical shells

Static Buckling of Orthotropic Spherical Shells on Elastic Foundations, Rakesh K. Jain and Yogendra Nath, EM Dec. 89 p2621-2634.

Spillways

Finite Analytic Solution of Flow Over Spillways, Wei Li, Qi Xie and Ching Jen Chen, EM Dec. 89 p2635-2648.

Stability

Buckling and Postbuckling of Heavy Columns, C. Y. Wang, EM Aug. 87 p1229-1233.

Buckling Behavior of Pressure Loaded Cylindrical Panels, Seishi Yamada and James G. A. Croll, EM Feb. 89 p327-344.

Buckling of Three-Dimensional Rigid—Link Model, Chiou S. Lee and Thomas J. Lardner, EM Jan. 89 p163-178.

Characteristics and Computational Procedure in Softening Plasticity, Kenneth Runesson, Ragnar Larsson and Stein Sture, EM Aug. 89 p1628-1646.

Curved Beam Elements for Nonlinear Analysis, Yeong-Bin Yang, Shy-Rong Kuo and Yunn-Dar Chherng, EM Apr. 89 p840-855.

Hysteretic Column Under Earthquake Excitations, Ismail I. Orabi, Goodarz Ahmadi and Lin Su, EM Jan. 89 p33-51.

Influential Mode of Imperfection on Carrying Capacity of Structures, Fumio Nishino and Wibisono Hartono, EM Oct. 89 p2150-2165.

Nonassociated Flow and Stability of Granular Materials, Poul V. Lade, Richard B. Nelson and Y. Marvin Ito, EM Sept. 87 p1302-1318.

Optimization of Imperfection-Sensitive Structures, G. V. Palassopoulos, EM Aug. 89 p1663-1682.

Reliability of Randomly Imperfect Beam-Columns, D. G. Liaw and T. Y. Yang, EM Oct. 89 p2251-2270.

Scheme for Elasticas with Snap-Back and Looping, Fumio Fujii, EM Oct. 89 p2166-2181.

Stability of Frictional Materials, K. Runesson and S. Sture, EM Aug. 89 p1828-1833.

Stability of Pretwisted Bars with Various End Torques, Yeong-Bin Yang and Jong-Dar Yau, EM Apr. 89 p671-688.

Stability of Spherical Shells on Elastic and Viscoelastic Foundations, D. N. Paliwal and R. N. Rai, EM May 89 p1121-1128.

Stable States and Paths of Structures with Plasticity or Damage, Zdeněk P. Bažant, EM Dec. 88 p2013-2034.

Viscoelastic Stability of Columns on Continuous Support, Liang-Jenq Leu and Yeong-Bin Yang, EM July 89 p1488-1499.

Stability analysis

Dynamic Stability Analysis by Matrix Function, Tsunemi Shigematsu, Takashi Hara and Mitao Ohga, EM July 87 p1085-1100.

Multilayered Finite Element Formulation for Vibration and Stability Analysis of Plates, H. Peter Huttelmaier and Marcelo Epstein, EM Feb. 89 p315-325.

Standards

Prager-Shield Optimality Criteria for Linear Segmentation, G. I. N. Rozvany, J. Menkenhagen and F. Spengemann, EM Jan. 89 p203-209.

Static loads

Exact Method for Static Analysis of Periodic Structures, Y. K. Cheung, H. C. Chan and C. W. Cai, EM Feb. 89 p415-434.

Point Loads in Cross-Anisotropic Layered Half-spaces, Sandra H. Seale and Eduardo Kausel, EM Mar. 89 p509-542.

Static structural analysis

Exact Method for Static Analysis of Periodic Structures, Y. K. Cheung, H. C. Chan and C. W. Cai, EM Feb. 89 p415-434.

Static tests

Bending of Circular Plates Supported at Number of Points, J. Raamachandran and G. C. Bhaskara Reddy, EM Feb. 89 p437-441.

Statics

Bending of Circular Plates Supported at Number of Points, J. Raamachandran and G. C. Bhaskara Reddy, EM Feb. 89 p437-441.

Steel structures

Shakedown Analysis in Plastic Design of Steel Structures, Yang Xiaofeng, EM Feb. 89 p304-314.

Stiffeners

Finite Element Analysis of Orthogonally Stiffened Annular Sector Plates, Alavandi Bhimaraddi, Peter J. Moss and Athol J. Carr, EM Sept. 89 p2074-2088.

Stiffening

Biaxial Tension Stiffening Due to Generally Oriented Reinforcing Layers, R. A. Link, A. E. Elwi and A. Scanlon, EM Aug. 89 p1647-1662.

Stiffened Coupled Shear Walls, H. C. Chan and J. S. Kuang, EM Apr. 89 p689-703.

Stiffness

Buckling of Three-Dimensional Rigid—Link Model, Chiou S. Lee and Thomas J. Lardner, EM Jan. 89 p163-178.

Dynamic Response of Elastic Plates on Viscoelastic Half Space, R. K. N. D. Rajapakse, EM Sept. 89 p1867-1881.

Elastic Stiffness of Flat Anchor Region at Cracked Geological Interface, A. P. S. Selvadurai, EM Jan. 89 p18-32.

Finite Element Analysis of Orthogonally Stiffened Annular Sector Plates, Alavandi Bhimaraddi, Peter J. Moss and Athol J. Carr, EM Sept. 89 p2074-2088.

Interaction of Buckling Modes of Panels with Symmetric Cross Section, Q. S. Fan, EM Nov. 89 p2526-2542.

Pseudolinear and Equivalent Systems for Large Deflections of Members, Demeter G. Fertis and Sudhakar Pallaki, EM Nov. 89 p2440-2459.

Theoretical and Experimental Study of Regular Packings of Granules, Ching S. Chang and Anil Misra, EM Apr. 89 p704-720.

Stiffness matrix

Beam-Column Element on Weak Winkler Foundation, A. Ghani Razaqpur, EM Aug. 89 p1798-1817.

Stochastic models

Equivalent Linearization Method in Nonlinear FEM, Ion Simulescu, Takashi Mochio and Masanobu Shinozuka, EM Mar. 89 p475-492.

Hysteretic Column Under Earthquake Excitations, Ismail I. Orabi, Goodarz Ahmadi and Lin Su, EM Jan. 89 p33-51.

Simulation of Seismic Ground Motion Using Stochastic Waves, George Deodatis and Masanobu Shinozuka, EM Dec. 89 p2723-2737.

Stochastic processes

Bounds on Response Variability of Stochastic Systems, George Deodatis and Masanobu Shinozuka, EM Nov. 89 p2543-2563.

Equivalent Linearization Method in Nonlinear FEM, Ion Simulescu, Takashi Mochio and Masanobu Shinozuka, EM Mar. 89 p475-492.

Response-Surface Approach for Reliability Analysis, Lucia Faravelli, EM Dec. 89 p2763-2781.

Stochastic Finite Element Expansion for Random Media, P. D. Spanos and Roger Ghanem, EM May 89 p1035-1053.

Stochastic Stability of Bridges Considering Coupled Modes: II, C. G. Bucher and Y. K. Lin, EM Feb. 89 p384-400.

Strain

Energy-Based Coupled Elastoplastic Damage Models at Finite Strains, J. W. Ju, EM Nov. 89 p2507-2525.

Extraction of Constitutive Data from Specimens Undergoing Strain Localization, M. Ortiz, EM Aug. 89 p1748-1760.

Model of Finite Strain Creep of Metals, Alan J. Levy and Maciej P. Bieniek, EM July 89 p1472-1487.

Numerical Representation of Bodner Viscoplastic Constitutive Model, Faysal A. Kolkailah and Andrew J. McPhate, EM Feb. 89 p223-230.

Size Effects on Strength, Toughness and Ductility, Alberto Carpinteri, EM July 89 p1375-1392.

Strain distribution

Size Effects on Strength, Toughness and Ductility, Alberto Carpinteri, EM July 89 p1375-1392.

Strain energy

Contribution of Gaussian Curvature to Strain Energy of Plates, Cheng Zhu and Frank L. DiMaggio, EM July 89 p1434-1440.

Strain hardening

Inelastic Buckling of Reinforcing Bars, S. T. Mau and Mounir El-Mabsout, EM Jan. 89 p1-17.

Strain rate

Dynamic Triaxial Tests of High-Strength Concrete, J. K. Gran, A. L. Florence and J. D. Colton, EM May 89 p891-904.

FEM Dynamic Fracture Analysis of Concrete Beams, Jiaji Du, Albert S. Kobayashi and Neil M. Hawkins, EM Oct. 89 p2136-2149.

Rate-Dependent Material Model for Structural Steel, K. C. Chang, K. Sugiura and G. C. Lee, EM Mar. 89 p465-474.

Strain softening

Measurement of Characteristic Length of Nonlocal Continuum, Zdeněk P. Bažant and Gilles Pijaudier-Cabot, EM Apr. 89 p755-767.

Size Effects on Strength, Toughness and Ductility, Alberto Carpinteri, EM July 89 p1375-1392.

Strength

Anisotropic Nature of Jointed Rock Mass Strength, Bernard Amadei and William Z. Savage, EM Mar. 89 p525-542.

Size Effect in Concrete, David Fanella and Dusan Krajcinovic, EM Apr. 88 p704-715.

Stress

Numerical Representation of Bodner Viscoplastic Constitutive Model, Faysal A. Kolkailah and Andrew J. McPhate, EM Feb. 89 p223-230.

A Posteriori Estimates for the Shear Correction Factors in Multilayered Composite Cylinders, Ahmed K. Noor and Jeanne M. Peters, EM June 89 p1225-1244.

Simple Mean Free Path Theory for Stresses in a Rapid Granular Flow, Marijan Babić and Hayley H. Shen, EM June 89 p1262-1282.

Smooth Limit Surfaces for Metals, Concrete, and Geotechnical Materials, Howard L. Schreyer, EM Sept. 89 p1960-1975.

Stress Interference in a Transversely Isotropic Body Under Axisymmetric Loading, S. M. Heinrich and J. -Y. Wang, EM Mar. 89 p555-577.

Structural Analysis of Bimodular Materials, W. W. El-Tahan, G. H. Staab, S. H. Advani and J. K. Lee, EM May 89 p963-981.

Stress analysis

Response-Surface Approach for Reliability Analysis, Lucia Faravelli, EM Dec. 89 p2763-2781.

Stress concentration

Shear and Normal Stresses in Adhesive Joints, T. M. Roberts, EM Nov. 89 p2460-2479.

Spheroidal Cavity with Prescribed Asymmetric Displacements in Three-Dimensional Transverse Isotropy, A. H. Zureick, EM Nov. 89 p2427-2439.

Stress Interference in a Transversely Isotropic Body Under Axisymmetric Loading, S. M. Heinrich and J. -Y. Wang, EM Mar. 89 p555-577.

Torsional Stress Concentration in Thin-Walled Beams, Lando Mentrasti, EM Sept. 89 p1882-1902.

Stress distribution

Stress Distribution and Deformation of Adhesive-Bonded Laminated Composite Beams, S. Cheng, X. Wei and T. Jiang, EM June 89 p1150-1162.

Stress Systems in Orthotropic Quarter Plane, M. C. Constantinou and Robin S. Greenleaf, EM Nov. 87 p1720-1738.

Stress intensity factor

A Crack Initiating from Rhombic Rigid Inclusion, Norio Hasebe, Minoru Ueda, Yoshiro Ito and Takuji Nakamura, EM Dec. 89 p2738-2748.

Frictional Punch and Crack in Plane Elasticity, Norio Hasebe, Mikiya Okumura and Takuji Nakamura, EM June 89 p1137-1149.

Mode I Fracture in Concrete Using Center-Cracked Plate Specimens, Manuel A. Alvarado, Surendra P. Shah and Reji John, EM Feb. 89 p366-383.

Stress strain relations

Theoretical and Experimental Study of Regular Packings of Granules, Ching S. Chang and Anil Misra, EM Apr. 89 p704-720.

Stress strain relations, soils

Slip Mechanism-Based Constitutive Model for Granular Soils, Ching S. Chang, Saroj P. Weeraratne and Anil Misra, EM Apr. 89 p790-807.

Structural analysis

Continuum Damage Theory—Application to Concrete, J. M. Mazars and G. Pijaudier-Cabot, EM Feb. 89 p345-365.

Dynamic Synthesis of Nonclassically Damped Substructures, L. E. Suarez and M. P. Singh, EM Jan. 89 p52-70.

Structural Analysis of Bimodular Materials, W. W. El-Tahan, G. H. Staab, S. H. Advani and J. K. Lee, EM May 89 p963-981.

Structural control

Experimental Digital Control of Structures, J. Rodellar, L. L. Chung, T. T. Soong and A. M. Reinhorn, EM June 89 p1245-1261.

Experimental Study of Active Control for MDOF Seismic Structures, L. L. Chung, R. C. Lin, T. T. Soong and A. M. Reinhorn, EM Aug. 89 p1609-1627.

Structural design

Earthquake Response Spectrum Analysis of Intake-Outlet Towers, Alok Goyal and Anil K. Chopra, EM July 89 p1413-1433.

Optimal Design for Axisymmetric Cylindrical Shell Buckling, Robert Levy and William R. Spillers, EM Aug. 89 p1683-1690.

Structural dynamics

Adaptive Modeling, Identification, and Control of Dynamic Structural Systems: II. Applications, Erdal Şfak, EM Nov. 89 p2406-2426.

Adaptive Modeling, Identification, and Control of Dynamic Structural Systems: I. Theory, Erdal Şfak, EM Nov. 89 p2386-2405.

Experimental Study of Active Control for MDOF Seismic Structures, L. L. Chung, R. C. Lin, T. T. Soong and A. M. Reinhorn, EM Aug. 89 p1609-1627.

In-Plane Vibrations of x-Braced Frames, Chin-Hao Chang and Guey-Shin Chang, EM Nov. 89 p2368-2385.

Modal Identification of Vibrating Structures Using ARMA Model, Yong Lin Pi and N. C. Mickleborough, EM Oct. 89 p2232-2250.

Simplified Evaluation of Added Hydrodynamic Mass for Intake Towers, Alok Goyal and Anil K. Chopra, EM July 89 p1393-1412.

Structural engineering

Basic Problem on Optimal Spatial Cable Layout, C. M. Wang and D. Jin, EM May 89 p1115-1120.

Wind Response Spectrum, Giovanni Solari, EM Sept. 89 p2057-2073.

Structural member

Analytical Solution to Free Vibration of Sector Plates, Issam E. Harik and Hamid R. Molaghasemi, EM Dec. 89 p2709-2722.

Structural members

Dynamic Stability of Thin-Walled Structural Members Under Periodic Axial Torque, Tadayoshi Aida, EM Jan. 89 p71-88.

Mixed Variational Formulation for Thin-Walled Beams with Shear Lag, K. K. Koo and Y. K. Cheung, EM Oct. 89 p2271-2286.

Pseudolinear and Equivalent Systems for Large Deflections of Members, Demeter G. Fertis and Sudhakar Pallaki, EM Nov. 89 p2440-2459.

Structural models

Experimental Study of Active Control for MDOF Seismic Structures, L. L. Chung, R. C. Lin, T. T. Soong and A. M. Reinhorn, EM Aug. 89 p1609-1627.

Structural plastics

Stable States and Paths of Structures with Plasticity or Damage, Zdeněk P. Bažant, EM Dec. 88 p2013-2034.

Structural response

Adaptive Modeling, Identification, and Control of Dynamic Structural Systems: II. Applications, Erdal Şafak, EM Nov. 89 p2406-2426.

Mode-Superposition Methods for Elastoplastic Systems, Giuseppe Muscolino, EM Oct. 89 p2199-2215.

Modified Frequency-Domain Data Processing, J. S. Hwang, K. C. Chang and G. C. Lee, EM Oct. 89 p2333-2339.

Structural Response Variability III, A. Kardara, C. G. Bucher and M. Shinozuka, EM Aug. 89 p1726-1747.

Structural safety

Experimental Study of Active Control for MDOF Seismic Structures, L. L. Chung, R. C. Lin, T. T. Soong and A. M. Reinhorn, EM Aug. 89 p1609-1627.

Structural stability

Asymmetrical Buckling of Prestressed Tapered Arches, Amde M. Wolde-Tinsae and Hossein Foadian, EM Sept. 89 p2020-2034.

Structural steels

Rate-Dependent Material Model for Structural Steel, K. C. Chang, K. Sugiura and G. C. Lee, EM Mar. 89 p465-474.

Structures

Active Optimal Control of Structure Using Optimal Observer, S. Baba, K. Ninoniya and Y. Hayashi, EM Nov. 89 p2564-2581.

Influential Mode of Imperfection on Carrying Capacity of Structures, Fumio Nishino and Wibisono Hartono, EM Oct. 89 p2150-2165.

Stochastic Finite Element Expansion for Random Media, P. D. Spanos and Roger Ghanem, EM May 89 p1035-1053.

Struts

Buckling and Postbuckling Analyses of Struts with Discrete Supports, S. T. Mau, EM Apr. 89 p721-739.

Buckling of Three-Dimensional Rigid—Link Model, Chiou S. Lee and Thomas J. Lardner, EM Jan. 89 p163-178.

Subgrades

Static Buckling of Orthotropic Spherical Shells on Elastic Foundations, Rakesh K. Jain and Yogendra Nath, EM Dec. 89 p2621-2634.

Subway tunnels

Steady State Vibration of Subway-Soil-Building System, T. Balendra, K. H. Chua, K. W. Lo and S. L. Lee, EM Jan. 89 p145-162.

Supports

Buckling and Postbuckling Analyses of Struts with Discrete Supports, S. T. Mau, EM Apr. 89 p721-739.

Surface waves

Diffraction of SV Waves by Circular Canyons of Various Depths, Vincent W. Lee and Hong Cao, EM Sept. 89 p2035-2056.

Synthesis

Mapping and Synthesis of RAndom Pressure Fields, Ahsan Kareem, EM Oct. 89 p2325-2332.

Systems

Economical Analysis of Combined Dynamical Systems, Taft H. Broome, Jr., EM Oct. 89 p2122-2135.

Eigenproperties of Classically Damped MDOF Composite Systems, Yan Zhang and Ronald S. Harichandran, EM July 89 p1515-1526.

Eigenproperties of Nonclassically Damped MDOF Composite Systems, Ronald S. Harichandran and Yan Zhang, EM July 89 p1527-1542.

System Reliability Under Time Varying Loads: I, Y. K. Wen and Y. -C. Chen, EM Apr. 89 p808-823.

System Reliability Under Time Varying Loads: II, Y. K. Wen and Y. -C. Chen, EM Apr. 89 p824-839.

Tall buildings

Aerodynamic Model Tests of Tall Buildings, Daryl W. Boggs and Jon A. Peterka, EM Mar. 89 p618-635.

Tanks

Nonlinear Oscillations in Rectangular Tanks, T. G. Lepelletier and F. Raichlen, EM Jan. 88 p1-23.

Temperature

Creep Buckling of Cylindrical Shell Under Variable Loading, S. M. Arnold, D. N. Robinson and A. F. Saleeb, EM May 89 p1054-1074.

Model of Finite Strain Creep of Metals, Alan J. Levy and Maciej P. Bieniek, EM July 89 p1472-1487.

Tendons

Finite Element Model for Curved Embedded Reinforcement, Alaa E. Elwi and Terry M. Hrudey, EM Apr. 89 p740-754.

Tensile load

Model of Finite Strain Creep of Metals, Alan J. Levy and Maciej P. Bieniek, EM July 89 p1472-1487.

Tensile strength

FEM Dynamic Fracture Analysis of Concrete Beams, Jiaji Du, Albert S. Kobayashi and Neil M. Hawkins, EM Oct. 89 p2136-2149.

Size Effects on Strength, Toughness and Ductility, Alberto Carpinteri, EM July 89 p1375-1392.

Tension

Biaxial Tension Stiffening Due to Generally Oriented Reinforcing Layers, R. A. Link, A. E. Elwi and A. Scanlon, EM Aug. 89 p1647-1662.

Tension Buckling of Rectangular Sheets Due to Concentrated Forces, Arthur W. Leissa and Essam F. Ayoub, EM Dec. 89 p2749-2762.

Tests

Modal Identification of Vibrating Structures Using ARMA Model, Yong Lin Pi and N. C. Mickleborough, EM Oct. 89 p2232-2250.

Theories

Engineering Large Deflection Theory for Thick Plates, George Z. Voyiadjis and Shahram Sarkani, EM May 89 p935-951.

Thermodynamics

Stable States and Paths of Structures with Plasticity or Damage, Zdeněk P. Bažant, EM Dec. 88 p2013-2034.

Thickness

Equivalent Systems for Variable Thickness Plates, Demeter G. Fertis and Milos M. Mijatov, EM Oct. 89 p2287-2300.

Thin wall structures

Equations of Curved Beams, Sundaramoorthy Rajasekaran and S. Padmanabhan, EM May 89 p1094-1111.

Mixed Variational Formulation for Thin-Walled Beams with Shear Lag, K. K. Koo and Y. K. Cheung, EM Oct. 89 p2271-2286.

Torsional Stress Concentration in Thin-Walled Beams, Lando Mentrasti, EM Sept. 89 p1882-1902.

Three-dimensional analysis

Constitutive Equations for Concrete in Failure State, R. de Boer and H. T. Dresenkamp, EM Aug. 89 p1591-1608.

Spheroidal Cavity with Prescribed Asymmetric Displacements in Three-Dimensional Transverse Isotropy, A. H. Zureick, EM Nov. 89 p2427-2439.

Three-dimensional flow

Motions of Small Rigid Spheres in Simulated Random Velocity Field, Hadj Ounis and Goodarz Ahmadi, EM Oct. 89 p2107-2121.

Three-dimensional models

Finite Element Modeling of Left Ventricle, K. B. Chandran, V. Wagle, D. Fisher, S. Collins, J. Rumberger, D. D. McPherson and D. J. Skorton, EM Aug. 89 p1821-1827.

Timbers

Application of Orthotropic Failure Criterion to Wood, Kaoru Hasebe and Seizou Usuki, EM Apr. 89 p867-872.

Time dependence

Influence Coefficients for Dynamic Response of Foundations, Hong Jinru and Sheldon Cherry, EM Nov. 89 p2493-2506.

Torsion

Aerodynamic Model Tests of Tall Buildings, Daryl W. Boggs and Jon A. Peterka, EM Mar. 89 p618-635.

Approximate Analysis of Twisted Parallelepiped, Robert Schmidt, EM Jan. 89 p216-220.

Buckling of Three-Dimensional Rigid—Link Model, Chiou S. Lee and Thomas J. Lardner, EM Jan. 89 p163-178.

Response Spectrum Analysis of Class of Torsionally-Coupled Buildings, Reem Hejal and Anil K. Chopra, EM Aug. 89 p1761-1781.

Stability of Pretwisted Bars with Various End Torques, Yeong-Bin Yang and Jong-Dar Yau, EM Apr. 89 p671-688.

Stress Distribution and Deformation of Adhesive-Bonded Laminated Composite Beams, S. Cheng, X. Wei and T. Jiang, EM June 89 p1150-1162.

Torsional Response of Symmetric Structures, Albert N. Lin, EM Feb. 89 p231-246.

Torsional Stress Concentration in Thin-Walled Beams, Lando Mentrasti, EM Sept. 89 p1882-1902.

Towers

Earthquake Response Spectrum Analysis of Intake-Outlet Towers, Alok Goyal and Anil K. Chopra, EM July 89 p1413-1433.

Simplified Evaluation of Added Hydrodynamic Mass for Intake Towers, Alok Goyal and Anil K. Chopra, EM July 89 p1393-1412.

Transducers

Hybrid Analysis of Shallow Spherical Shells, Sameh S. Issa, EM Jan. 88 p65-79.

Transient response

Nonlinear Oscillations in Rectangular Tanks, T. G. Lepelletier and F. Raichlen, EM Jan. 88 p1-23.

Role of Damping in Anomalous Response to Short Pulse Loading, U. Perego, G. Borino and P. S. Symonds, EM Dec. 89 p2782-2788.

Transverse loads

Elastodynamic Response of Pile Under Transverse Excitations, Ronald Y. S. Pak and Paul C. Jennings, EM July 87 p1101-1106.

Transverse shear

Analysis of Large-Diameter Fabricated Steel Tubes Under Transverse Shear, Vasile G. Roman and Alaa E. Elwi, EM Dec. 89 p2587-2600.

Transverse strength

Stress Interference in a Transversely Isotropic Body Under Axisymmetric Loading, S. M. Heinrich and J. -Y. Wang, EM Mar. 89 p555-577.

Trashracks

Force Oscillator Model for Rectangular Cylinder, Stephen John Callander, EM June 89 p1336-1346.

Triaxial compression

Fracture Energy-Based Plasticity Formulation of Plain Concrete, Eddy Pramono and Kaspar Willam, EM June 89 p1183-1204.

Triaxial tests

Dynamic Triaxial Tests of High-Strength Concrete, J. K. Gran, A. L. Florence and J. D. Colton, EM May 89 p891-904.

Microplane Model for Brittle Plastic Material: II. Verification, Zdeněk P. Bažant and Pere C. Prat, EM Oct. 88 p1689-1699.

Microplane Model for Brittle-Plastic Material: I. Theory, Zdeněk Bažant and Pere C. Prat, EM Oct. 88 p1672-1688.

Nonassociated Flow and Stability of Granular Materials, Poul V. Lade, Richard B. Nelson and Y. Marvin Ito, EM Sept. 87 p1302-1318.

Trusses

Influential Mode of Imperfection on Carrying Capacity of Structures, Fumio Nishino and Wibisono Hartono, EM Oct. 89 p2150-2165.

New Formulation for Vibration Analysis, R. J. Melosh and H. A. Smith, EM Mar. 89 p543-554.

Plastic Reliability Analysis by Directional Simulation, Ove Ditlevsen and Peter Bjerager, EM June 89 p1347-1362.

Tubes

Mechanical Model for Oscillating Water Column with Compressibility, S. Szumko, EM Sept. 89 p1851-1866.

Turbulence

Deterministic Model for Wind-Induced Oscillations of Buildings, Thambirajah Balendra, G. K. Nathan and Kok Hin Kang, EM Jan. 89 p179-199.

Motion Stability of Long-Span Bridges Under Gusty Winds, George Tsiatas and Partha P. Sarkar, EM Feb. 88 p257-276.

Stochastic Stability of Bridges Considering Coupled Modes: II, C. G. Bucher and Y. K. Lin, EM Feb. 89 p384-400.

Turbulent diffusion

Motions of Small Rigid Spheres in Simulated Random Velocity Field, Hadj Ounis and Goodarz Ahmadi, EM Oct. 89 p2107-2121.

Two-dimensional

Error Estimation for Boundary Element Analysis, Joseph J. Rencis and Kwo-Yih Jong, EM Sept. 89 p1993-2010.

Two-dimensional models

Antiplane Earthquake Waves in Long Structures, M. I. Todorovska and M. D. Trifunac, EM Dec. 89 p2787-2708.

Seismic Waves in Buildings with Shear Walls Or Central Core, M. I. Todorovska and V. W. Lee, EM Dec. 89 p2669-2686.

Ultrasonic testing

Measurement and Description of Tensile Fracture in Granite, J. F. Labuz, S. P. Shah and C. H. Dowding, EM Sept. 89 p1935-1949.

Uncertainty analysis

System Reliability Under Time Varying Loads: II, Y. K. Wen and Y. -C. Chen, EM Apr. 89 p824-839.

Variability

Bounds on Response Variability of Stochastic Systems, George Deodatis and Masanobu Shinozuka, EM Nov. 89 p2543-2563.

Equivalent Systems for Variable Thickness Plates, Demeter G. Fertis and Milos M. Mijatov, EM Oct. 89 p2287-2300.

Stochastic Finite Element Expansion for Random Media, P. D. Spanos and Roger Ghanem, EM May 89 p1035-1053.

Structural Response Variability III, A. Kardara, C. G. Bucher and M. Shinozuka, EM Aug. 89 p1726-1747.

Velocity

Motions of Small Rigid Spheres in Simulated Random Velocity Field, Hadj Ounis and Goodarz Ahmadi, EM Oct. 89 p2107-2121.

Velocity distribution

Simple Mean Free Path Theory for Stresses in a Rapid Granular Flow, Marijan Babić and Hayley H. Shen, EM June 89 p1262-1282.

Vertical cylinders

Free-Surface Flow Produced by Accelerating Vertical Cylinder, Keh-Han Wang and Allen T. Chwang, EM July 89 p1559-1566.

Vibration

Active Optimal Control of Structure Using Optimal Observer, S. Baba, K. Ninoniya and Y. Hayashi, EM Nov. 89 p2564-2581.

Adaptive Modeling, Identification, and Control of Dynamic Structural Systems: II. Applications, Erdal Şfak, EM Nov. 89 p2406-2426.

Axisymmetric Vibration of Disk Resting on Saturated Layered Half-Space, A. J. Philippacopoulos, EM Oct. 89 p2301-2322.

Characteristics of Response to Nonstationary White Noise: Theory, Takeru Igusa, EM Sept. 89 p1904-1918.

Characteristics of Response to Nonstationary White Noise: Applications, Takeru Igusa, EM Sept. 89 p1919-1934.

Dynamic Response of Elastic Plates on Viscoelastic Half Space, R. K. N. D. Rajapakse, EM Sept. 89 p1867-1881.

Dynamic Stability of Thin-Walled Structural Members Under Periodic Axial Torque, Tadayoshi Aida, EM Jan. 89 p71-88.

In-Plane Vibrations of x-Braced Frames, Chin-Hao Chang and Guey-Shin Chang, EM Nov. 89 p2368-2385.

Lower Bounds for Eigenvalues via Rayleigh's Method, Robert Schmidt, EM June 89 p1365-1370.

Modal Identification of Vibrating Structures Using ARMA Model, Yong Lin Pi and N. C. Mickleborough, EM Oct. 89 p2232-2250.

Paradox Unresolved, A. S. Richardson, Jr., EM May 89 p905-912.

A Posteriori Estimates for the Shear Correction Factors in Multilayered Composite Cylinders, Ahmed K. Noor and Jeanne M. Peters, EM June 89 p1225-1244.

Seismic Response of Strip Footings on Zoned Viscoelastic Soils, Jose Dominguez and Ramon Abascal, EM May 89 p913-934.

Tension Buckling of Rectangular Sheets Due to Concentrated Forces, Arthur W. Leissa and Essam F. Ayoub, EM Dec. 89 p2749-2762.

Wind Induced Vibration of Two Flexible Cylindrical Structures, Le-Chung Shiau, EM Sept. 89 p2089-2098.

Vibration analysis

Analytical Solution to Free Vibration of Sector Plates, Issam E. Harik and Hamid R. Molaghasemi, EM Dec. 89 p2709-2722.

Multilayered Finite Element Formulation for Vibration and Stability Analysis of Plates, H. Peter Huttelmaier and Marcelo Epstein, EM Feb. 89 p315-325.

New Formulation for Vibration Analysis, R. J. Melosh and H. A. Smith, EM Mar. 89 p543-554.

Vibration effects

Floor Spectra With Equipment-Structure-Equipment Interaction Effects, Luis E. Suarez and Mahendra P. Singh, EM Feb. 89 p247-246.

Vibrations

Antiplane Earthquake Waves in Long Structures, M. I. Todorovska and M. D. Trifunac, EM Dec. 89 p2787-2708.

Viscoelasticity

Solidification Theory for Concrete Creep—I. Formulation, Zdeněk P. Bažant and Santosh Prasannan, EM Aug. 89 p1691-1703.

Solidification Theory for Concrete Creep II. Verification and Application, Zdeněk P. Bažant and Santosh Prasannan, EM Aug. 89 p1704-1725.

Stability of Spherical Shells on Elastic and Viscoelastic Foundations, D. N. Paliwal and R. N. Rai, EM May 89 p1121-1128.

Viscoplasticity

Creep Buckling of Cylindrical Shell Under Variable Loading, S. M. Arnold, D. N. Robinson and A. F. Saleeb, EM May 89 p1054-1074.

Method for Solving Inverse Elastoviscoplastic Problems, Antoinette Maniatty and Nicholas Zabaras, EM Oct. 89 p2216-2231.

Void ratio

Random Nature of Soil Porosity and Related Properties, Kingsley Harrop-Williams, EM May 89 p1129-1133.

Volume change

Nonassociated Flow and Stability of Granular Materials, Poul V. Lade, Richard B. Nelson and Y. Marvin Ito, EM Sept. 87 p1302-1318.

Vortex shedding

Force Oscillator Model for Rectangular Cylinder, Stephen John Callander, EM June 89 p1336-1346.

Vortices

Wind Induced Vibration of Two Flexible Cylindrical Structures, Le-Chung Shiau, EM Sept. 89 p2089-2098.

Walls

Optimal Design for Axisymmetric Cylindrical Shell Buckling, Robert Levy and William R. Spillers, EM Aug. 89 p1683-1690.

Warpage

Equations of Curved Beams, Sundaramoorthy Rajasekaran and S. Padmanabhan, EM May 89 p1094-1111.

Torsional Stress Concentration in Thin-Walled Beams, Lando Mentrasti, EM Sept. 89 p1882-1902.

Water content

Random Nature of Soil Porosity and Related Properties, Kingsley Harrop-Williams, EM May 89 p1129-1133.

Water pressure

Anisotropic Nature of Jointed Rock Mass Strength, Bernard Amadei and William Z. Savage, EM Mar. 89 p525-542.

Wave dispersion

Seismic Response of Strip Footings on Zoned Viscoelastic Soils, Jose Dominguez and Ramon Abascal, EM May 89 p913-934.

Wave equations

Hydrodynamic Pressure on Gravity Dams Subjected to Ground Motions, Chong-Shien Tsai and George C. Lee, EM Mar. 89 p598-617.

Waves

Mean Flow Circulation Equations for Shoaling and Breaking Waves, Rodney J. Sobey and Robert J. Thieke, EM Feb. 89 p285-303.

Seismic Response of Strip Footings on Zoned Viscoelastic Soils, Jose Dominguez and Ramon Abascal, EM May 89 p913-934.

White noise

Characteristics of Response to Nonstationary White Noise: Theory, Takeru Igusa, EM Sept. 89 p1904-1918.

Characteristics of Response to Nonstationary White Noise: Applications, Takeru Igusa, EM Sept. 89 p1919-1934.

White Noise Processes, Mircea Grigoriu, EM May 87 p757-765.

Wind

Deterministic Model for Wind-Induced Oscillations of Buildings, Thambirajah Balendra, G. K. Nathan and Kok Hin Kang, EM Jan. 89 p179-199.

Motion Stability of Long-Span Bridges Under Gusty Winds, George Tsiatas and Partha P. Sarkar, EM Feb. 88 p257-276.

Paradox Unresolved, A. S. Richardson, Jr., EM May 89 p905-912.

Transient Wind-Induced Internal Pressures, Theodore Stathopoulos and Horia D. Luchian, EM July 89 p1501-1514.

Wind Induced Vibration of Two Flexible Cylindrical Structures, Le-Chung Shiau, EM Sept. 89 p2089-2098.

Wind forces

Blockage Correction for Sharp-Edged Bluff Bodies, A. S. Ramamurthy, R. Balachandar and Diep Ngoc Vo, EM July 89 p1569-1576.

Wind Induced Vibration of Two Flexible Cylindrical Structures, Le-Chung Shiau, EM Sept. 89 p2089-2098.

Wind Response Spectrum, Giovanni Solari, EM Sept. 89 p2057-2073.

Wind loads

Aerodynamic Model Tests of Tall Buildings, Daryl W. Boggs and Jon A. Peterka, EM Mar. 89 p618-635.

Analysis of Long Cantilever Cylindrical Shell Subjected to Wind Loading, K. Chandrashekhara, EM Sept. 89 p2101-2105.

Load Transfer Mechanisms in Wind-Loaded Cylinders, David A. Pecknold, EM Nov. 89 p2353-2367.

Wind speed

New Method for Prediction of Extreme Wind Speeds, G. R. Dargahi-Noubary, EM Apr. 89 p859-866.

Wind tunnel models

Aerodynamic Model Tests of Tall Buildings, Daryl W. Boggs and Jon A. Peterka, EM Mar. 89 p618-635.

Wind tunnel test

Aerodynamic Model Tests of Tall Buildings, Daryl W. Boggs and Jon A. Peterka, EM Mar. 89 p618-635.

Transient Wind-Induced Internal Pressures, Theodore Stathopoulos and Horia D. Luchian, EM July 89 p1501-1514.

Wire rope

Effect of Length on Fatigue Life of Long Thin Continuous Components, J. L. Bogdanoff and F. Kozin, EM July 89 p1441-1457.

Upper Bound to Mechanical Power Transmission Losses in Wire Rope, Raymond A. LeClair, EM Sept. 89 p2011-2019.

Wood

Predicting Creep of Nailed Lumber-to-Plywood Joints, Anton Polensek and Sangsik Jang, EM Oct. 89 p2182-2198.

Wooden structures

Predicting Creep of Nailed Lumber-to-Plywood Joints, Anton Polensek and Sangsik Jang, EM Oct. 89 p2182-2198.

Yield

Application of Orthotropic Failure Criterion to Wood, Kaoru Hasebe and Seizou Usuki, EM Apr. 89 p867-872.

Yield stress

Beam on Partially Yielded Foundation, Shoji E. Yamada, EM Feb. 88 p353-363.
